Understanding Industrial Property

Accounting has an ever-increasing significance in contemporary society; its practices are seen as fundamental to the development and functioning of modern capitalist societies. This book showcases some of the pioneering work that has persuasively explained to what extent economic life is constituted through the calculative practices of accounting.

Journal of Business Research

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Smart Sustainable Cities of the Future

Since the mid-1990s risk management has dramatically expanded its reach and significance to become a benchmark of good governance for a wide variety of public and private organizations. This book shows that the rise of risk management has much less to do with real dangers and opportunities than with organizational accountability and legitimacy.

International Journal of Technology Diffusion, Issue 3

The Routledge Companion to Qualitative Accounting Research Methods

A-CSEAR 2015-Proceedings of the 14th Australasian Centre on Social and Environmental Accounting Research Conference

Event Studies is the only book devoted to developing knowledge and theory about planned events. It focuses on event planning and management, outcomes, the experience of events and the meanings attached to them, the dynamic processes shaping events and why people attend them. This title draws from a large number of foundation disciplines and closely related professional fields, to foster interdisciplinary theory focused on planned events. It brings together important discourses on events including event management, event tourism, and the study of events within various disciplines that are able to shed light on the roles, importance and impacts of events in society and culture. New to this edition: New sections on social and intangible influences, consumer psychology and legal environment, planning and policy framework to reflect recent developments in the field Extended coverage of philosophy and research methods and how they can best be used in event studies; social media as a marketing tool; and the class and cultural influences of events New and additional case studies throughout the book from a wide range of international events Companion website to include PowerPoint slides and updated Instructor's Manual including suggested lecture outlines and sequence, quizzes per chapter and essay questions.

The Management Accountant

Creating the Discipline of Knowledge Management

The International Journal of Technology Diffusion (IJTD) is an international journal publishing original scientific and quality research articles on management information systems, technology diffusion, and business systems application aspects of e-commerce, e-government, and mobile applications. As a forum of multi-disciplinary and interdisciplinary dialogue, it addresses research on all aspects of innovation diffusion in the field of business computing technologies and their past, present, and future use.

Handbook of Research on Contemporary Consumerism

Equity Valuation

Includes research papers that examines various issues including the adoption of International Financial Reporting Standards (IFRS) and International Public Sector

Accounting Standards (IPSASs), management accounting change in the context of public sector reforms, corporate reporting disclosures, auditing, etcetera.

Performance Management in Nonprofit Organizations

The paper provides robust evidence that compliance with Basel Core Principles (BCPs) has a strong positive effect on the Z-score of conventional banks, albeit less pronounced on the Zscore of Islamic banks. Using a sample of banks operating in 19 developing countries, the results appear to be driven by capital ratios, a component of Z-score for the two types of banks. Even though smaller on Islamic banks, individual chapters of BCPs also suggest a positive effect on the stability of conventional banks. The findings support the effective role of BCP standards in improving bank stability, whose important implications led to the Islamic Financial Services Board (IFSB) publication of new recommendations in 2015 to bring BCP standards in line with the Core Principles for Islamic Finance Regulation (CPIFRs) standards. Our findings suggest that because Islamic banks are benchmarked closely to BCPs, the implementation of CPFIRs should also positively affect their stability.

Event Studies

Societal marketing has gained widespread recognition in the marketing discipline both in academia and the professional industry. The Handbook of Research on Contemporary Consumerism is an essential reference source that provides an in-depth understanding on the various aspects and issues of consumerism and reveals the critical success factors and conceptual and theoretical frameworks of these concepts from recent contexts and perspectives. Additionally, it examines the impact of identity on marketing and branding from the consumerist perspective, discusses consumerism as a source of innovation and product development, and provides insights on consumerism and profitability. Featuring research on topics such as circular economy, digital marketing, and social media, this book is ideally designed for practitioners, managers, marketers, academic researchers, and students.

The Instinct of Workmanship

This book is written for members of the scholarly research community, and for persons involved in research evaluation and research policy. More specifically, it is directed towards the following four main groups of readers: – All scientists and scholars who have been or will be subjected to a quantitative assessment of research performance using citation analysis. – Research policy makers and managers who wish to become conversant with the basic features of citation analysis, and about its potentialities and limitations. – Members of peer review committees and other evaluators, who consider the use of citation analysis as a tool in their assessments. – Practitioners and students in the field of quantitative science and technology studies, informetrics, and library and information science. Citation analysis involves the construction and application of a series of indicators of the 'impact', 'influence' or 'quality' of scholarly work, derived from citation data, i.e. data on references cited in footnotes or bibliographies of scholarly research

publications. Such indicators are applied both in the study of scholarly communication and in the assessment of research performance. The term 'scholarly' comprises all domains of science and scholarship, including not only those fields that are normally denoted as science – the natural and life sciences, mathematical and technical sciences – but also social sciences and humanities.

The Handbook of Research on Top Management Teams

Journal of Financial Economics

Bridging the Gap Between Academic Accounting Research and Professional Practice

This booklet provides an introduction for newcomers to the subject of industrial property. It explains the principles underpinning industrial property rights, and describes the most common forms of industrial property, including patents and utility models for inventions, industrial designs, trademarks and geographical indications.

Dodd-Frank Wall Street Reform and Consumer Protection Act

The 14th Australasian Centre on Social and Environmental Accounting Research Conference (A-CSEAR 2015) is being held on 10-11 December 2015 at Macquarie University, Sydney, Australia. The Conference Chair is Dr John Dumay and the Programme Chair is Dr James Hazelton, both from Macquarie University. ACSEAR provides an opportunity for individuals researching and working in the field of social and environmental accounting in both public and private sectors, to come together to exchange ideas and discuss current research in the field. The theme for the conference this year is 'Partnerships', reflecting the belief amongst our community that achieving progress requires partnerships of all types – between academics of different disciplines, between industry and academia, between government and stakeholders, and of course between members and professional bodies. The keynote speakers for the conference are Charles de Villiers from Auckland University of Technology, New Zealand on the topic Theorising the interactions among legitimacy accountability and pro-activity in the social sphere; Helen Tregidga from Auckland University of Technology, New Zealand talking about Corporate chameleons greenwashing and counter narratives"; Markus J. Milne from the School of Business and Law at the University of Canterbury, New Zealand on the topic of Crass empiricism and the social construction of corporate environmental performance and Lee D. Parker from the School of Accounting, RMIT University, Melbourne, Australia who will address to issue of Accounting for CSR: Revisiting the agenda. ACSEAR received 60 abstract submissions. After the double-blind peer review process 21 academic research papers, have been accepted for publication in these conference proceedings. These papers represent research from around the world, including Australia, Brazil, China, Fiji, Iran, Italy, Japan, New Zealand, South Africa, UK and the USA.

The Ministry of Utmost Happiness

Focusing on research that examines both individual and organizational behavior relative to accounting, this volume of *Advances in Accounting Behavioral Research* offers a perspectives on topics such as tax compliance, risk judgement, and affiliation bias.

PACIFIC-BASIN FINANCE JOURNAL

With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. *Performance Management in Nonprofit Organizations* focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.

Organized Uncertainty

There are many studies confirming the relationship between financial systems and economic development, but there are few which examine the degree to which financial systems a) impact the quality of information, b) influence sound corporate governance, c) ensure effective mechanisms of risk management, d) mobilize savings and f) facilitate trade. In the context of sustainability, there should also be a line of inquiry into how a particular financial system influences the assurance and implementation of sustainable development principles and goals. This book delivers a methodological approach to designing and assessing sustainable financial systems. It provides an original contribution by prioritizing ESG factors in the decision-making process of financial institutions and identifying their impact on sustainable financial systems. The author argues that to achieve financial stability, it is necessary to have in place mechanisms designed to prevent financial problems from becoming systemic and/or threatening the stability of the financial and economic system, while maintaining (or not undermining) the economy's ability to sustain growth and perform its other functions. The book primarily takes a simulation and experimental approach. It is the first book to take such a comprehensive look at sustainable financial systems as opposed to sustainable finance in general. It will appeal to academics, students and researchers in the

fields of economics, finance and banking, business, management and political and social sciences.

Transportation Journal

Advances in Management Accounting

Volume 23 of Advances in Management Accounting features articles on a variety of current topics in management accounting that are relevant to researchers in both academe and practice. From its position as one of the premier management accounting research journals, the series is well poised to meet the needs of management accounting scholars.

Two Hundred Years of Accounting Research

How to Write a Good Scientific Paper

This Handbook presents original research and theory on executives, top management teams, and boards of directors and illustrates the vital importance of this field of study. Top management teams are responsible for the strategic choices and major decisions in organizations. These organizations are a reflection of the members that make up their strategic management. The roles top management play and the impact they have are clearly visible in firms around the world, both large and small. The international group of authors that comprise this volume address questions central to the field of strategy and strategic leadership. They review the determinants of top management team composition, their social networks, and executive dismissal; the psychological and personality profiles of top executives; the methodologies relevant to the study of top teams; and the roles of top executives in cross business unit collaboration, competitive behavior, and strategic entrepreneurship. Each chapter presents path-breaking research and provides a roadmap for new research avenues and agendas. Professors, students and researchers in the area of strategy, management and strategic leadership will find this book an invaluable resource.

Relevance Lost

The modern era of business has prompted an increased focus on the consumer and the responsibility of corporations to consider their ethical and social obligations to their customers. The rise of the consumerist movement has encouraged further research and development on the topic of consumerism, enabling business to succeed in a consumer-driven market. Handbook of Research on Consumerism in Business and Marketing: Concepts and Practices features research on diverse topics on consumerism in the global marketplace, focusing on the ways in which businesses can improve their relationships with customers as well as analyze and influence purchasing behavior. As a comprehensive reference source on topics pertaining to consumer management, identity, and behavior, this publication is intended for use by marketing professionals, business managers, students, and academicians.

Advances in Accounting Behavioral Research

Equity Valuation reviews and critically examines the standard approach to equity valuation using a constant risk-adjusted cost of capital and develops a new valuation approach discounting risk-adjusted fundamentals using nominal zero-coupon interest rates. Equity Valuation is organized as follows. Chapter 2 (Risk-adjusted Discount Rates) reviews standard valuation models based on risk-adjusted discount rates. Chapter 3 (Multi-period Asset Pricing Theory and Accounting Relations) examines key results from multi-period asset pricing theory in discrete-time, and shows how equity valuation models can equivalently be based on free cash flows or accrual accounting numbers. Based on these results, the authors derive an accounting-based multi-period equity valuation model presented in Chapter 4 (An Accounting-based Multi-period Equity Valuation Model) with equilibrium risk-adjustments determined by prices of aggregate consumption claims. Chapter 5 (Equity Valuation with HARA Utility) includes a general equilibrium analysis of a setting in which the investors have HARA utility, and aggregate consumption and residual operating income are jointly normally distributed. A set of appendices follows including Appendix B that extends the setting to preferences with external habit formation (which recently has gained popularity in asset pricing theory), and Appendix C, which discusses the relationship between risk-adjusted expected cash flows and certainty equivalents.

Journal of Business Venturing

In this book Dr. Michael Stankosky, founder of the first doctoral program in knowledge management, sets out to provide a rationale and solid research basis for establishing Knowledge Management (KM) as an academic discipline. While it is widely known that Knowledge is the driver of our knowledge economy, Knowledge Management does not yet have the legitimacy that only rigorous academic research can provide. This book lays out the argument for KM as a separate academic discipline, with its own body of knowledge (theoretical constructs), guiding principles, and professional society. In creating an academic discipline, there has to be a widely accepted theoretical construct, arrived at by undergoing scholarly scientific investigation and accompanying rigor. This construct becomes

the basis for an academic curriculum, and proven methodologies for practice. Thus, the chapters in this book bridge theory and practice, providing guiding principles to those embarking on or evaluating the merits of a KM program. As a methodology itself for undertaking the development of a body of knowledge, a KM Research Map was developed to guide scholars, researchers, and practitioners. This book presents this map, and showcases cutting-edge scholarship already performed in this nascent field by including the dissertation results of eleven KM scholar/practitioners.

Library & Information Science Abstracts

Accounting, Organizations, and Institutions

Selecting from the wide range of research methodologies remains a dilemma for all scholars, not least those looking to study the world of accounting. Both established and emerging research methods are frequently advocated, creating a challengingly broad range of choices. Covering a selection of qualitative methodological issues, research strategies and methods, this comprehensive compilation provides an essential guide to the choice and execution of qualitative research approaches in this field. The contributions are grouped into four sections: Worldview and paradigms Methodologies and strategies Data collection methods and analysis Experiencing qualitative field research: personal reflections Edited by leading scholars, with contributions from experts and rising stars, this volume will be essential reading for anyone looking to undertake research in the qualitative accounting field.

Decision-making in a Fuzzy Environment

Includes the institute's Proceedings.

Finance and Sustainable Development

This book is intended to help explore the field of smart sustainable cities in its complexity, heterogeneity, and breadth, the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world. Indeed, sustainable urban development is currently at the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms, and shaping the way cities will evolve in the future and thus tackle complex challenges. This book integrates computer science, data science, complexity science, sustainability science, system thinking, and urban planning and design. As such, it contains innovative computer-based and data-analytic research on smart sustainable cities as complex and dynamic systems. It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes. It offers contributions pertaining to the ongoing development of computer-based and data science technologies for the processing, analysis, management, modeling, and simulation of big and context data and the associated applicability to urban

systems that will advance different aspects of sustainability. This book seeks to explicitly bring together the smart city and sustainable city endeavors, and to focus on big data analytics and context-aware computing specifically. In doing so, it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability. Its strength lies in combining big data and context-aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development. This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data-centric and context-aware solutions for enhancing urban systems and facilitating coordination among urban domains. This timely and comprehensive book is aimed at a wide audience across science, academia industry, and policymaking. It provides the necessary material to inform relevant research communities of the state-of-the-art research and the latest development in the area of smart sustainable urban development, as well as a valuable reference for planners, designers, strategists, and ICT experts who are working towards the development and implementation of smart sustainable cities based on big data analytics and context-aware computing.

Handbook of Research on Consumerism in Business and Marketing: Concepts and Practices

This is the first and only book to offer a comprehensive survey of accounting research on a broad international scale for the last two centuries. Its main emphasis is on accounting research in the English, German, Italian, French and Spanish language areas; it also contains chapters dealing with research in Finland, the Netherlands, Scand

International Journal of Sustainable Economies Management (IJSEM).

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

The Journal of the Iron and Steel Institute

AMSTAT News

Traces the history of the role of management accounting in business and argues that present management accounting systems have become obsolescent.

Basel Compliance and Financial Stability

New York Times Best Seller Longlisted for the Man Booker Prize Named a Best Book of 2017 by NPR, Amazon, Kirkus, The Washington Post, Newsday, and the Hudson Group A dazzling, richly moving new novel by the internationally celebrated author of *The God of Small Things* *The Ministry of Utmost Happiness* takes us on an intimate journey of many years across the Indian subcontinent—from the cramped neighborhoods of Old Delhi and the roads of the new city to the mountains and valleys of Kashmir and beyond, where war is peace and peace is war. It is an aching love story and a decisive remonstrance, a story told in a whisper, in a shout, through unsentimental tears and sometimes with a bitter laugh. Each of its characters is indelibly, tenderly rendered. Its heroes are people who have been broken by the world they live in and then rescued, patched together by acts of love—and by hope. The tale begins with Anjum—who used to be Aftab—unrolling a threadbare Persian carpet in a city graveyard she calls home. We encounter the odd, unforgettable Tilo and the men who loved her—including Musa, sweetheart and ex-sweetheart, lover and ex-lover; their fates are as entwined as their arms used to be and always will be. We meet Tilo's landlord, a former suitor, now an intelligence officer posted to Kabul. And then we meet the two Miss Jebeens: the first a child born in Srinagar and buried in its overcrowded Martyrs' Graveyard; the second found at midnight, abandoned on a concrete sidewalk in the heart of New Delhi. As this ravishing, deeply humane novel braids these lives together, it reinvents what a novel can do and can be. *The Ministry of Utmost Happiness* demonstrates on every page the miracle of Arundhati Roy's storytelling gifts.
