### **A Girl's Right to Learn Without Fear: Working to End Gender-based Violence**

This book brings together some of the most interesting and innovative work being done to tackle gender-based violence in various sectors, world regions, and socio-political contexts. It will be useful to development and humanitarian practitioners, policy makers, and academics, including gender specialists.

### **Home SOS**

### **Preventing Gender-Based Violence, Building Livelihoods**

In universities across the world, academics struggle to establish and sustain their careers while satisfying intensifying institutional demands. Drawing from the author's decades of observation and experience in academia, this exceptional book responds to the challenges of fostering and sustaining a successful academic career.

### **How to be an Academic Superhero**

This book offers new perspectives on gender-based violence in three regions where the subject has been taboo in everyday discourse often due to patriarchal cultural

norms that limit women's autonomy. The contributions to this book provide rare insight into not only the levels and the socio-demographic determinants of domestic violence, but topics ranging from men's attitudes toward wife beating; domestic violence-related adolescent deaths, and women's health problems due to sexual and physical abuse. With a comprehensive introduction that provides a comparative international research framework for discussing gender-based violence in these three unique regions, this volume provides a key basis for understanding gender-based violence on a more global level. Part I, on Africa, covers men's attitudes towards domestic violence, the impact of poverty and fertility, the association between adolescent deaths and domestic violence, and the link between domestic abuse and HIV. Part II, on the Middle East, covers the importance of consanguinity on domestic violence in Egypt and Jordan, the effects of physical abuse on reproductive health, and the link between political unrests and women's experience and attitudes towards domestic violence. Part III, on India, shows how sexual abuse puts women at risk of reproductive tract infections and sexually transmitted infections, as well as the role of gender norms in wife abuse and the role of youth aggressive behavior in nonconsensual sex. With such a deep and broad coverage of factors of intimate partner abuse, this book serves as a reference document for researchers, decision-makers, and organizations that are searching for ways to reduce gender-based domestic violence. This book is of interest for researchers in Criminology and Criminal Justice, as well as Sociology, Social Work, Public Health and Human Rights.

### **Consolidated Guideline on Sexual and Reproductive Health and Rights of Women Living with HIV**

The United Nations has called violence against women "the most pervasive, yet least recognized human rights abuse in the world" and there is a long-established history of the systematic victimization of women by the state during times of peace and conflict. This book contributes to the established literature on women, gender and crime and the growing research on state crime and extends the discussion of violence against women to include the role and extent of crime and violence perpetrated by the state. *State Crime, Women and Gender* examines state-perpetrated violence against women in all its various forms. Drawing on case studies from around the world, patterns of state-perpetrated violence are examined as it relates to women's victimization, their role as perpetrators, resisters of state violence, as well as their engagement as professionals in the international criminal justice system. From the direct involvement of Condoleezza Rice in the United States-led war on terror, to the women of Egypt's Arab Spring Uprising, to Afghani poetry as a means to resist state-sanctioned patriarchal control, case examples are used to highlight the pervasive and enduring problem of state-perpetrated violence against women. The exploration of topics that have not previously been addressed in the criminological literature, such as women as perpetrators of state violence and their role as willing consumers who reinforce and replicate the existing state-sanctioned patriarchal status quo, makes *State Crime, Women and Gender* a must-read for students and scholars engaged in the study of state crime, victimology and feminist criminology.

### **Ending Violence Against Women**

Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

### **Addressing Gender-based Violence in the Latin American and Caribbean Region**

The starting point for this guideline is the point at which a woman has learnt that she is living with HIV, and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities, as well as from the health-care institutions where they seek care, particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan, develop and monitor programs and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV, taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

### **Applying Anthropology to Gender-Based Violence**

Since its first publication over twenty years ago, *Images of Organization* has become a classic in the canon of management literature. The book is based on a very simple premise—that all theories of organization and management are based on implicit images or metaphors that stretch our imagination in a way that can create powerful insights, but at the risk of distortion. Gareth Morgan provides a rich and comprehensive resource for exploring the complexity of modern organizations internationally, translating leading-edge theory into leading-edge practice.

### **Violence at Work**

Drawing on 15 years of fieldwork and over 300 interviews, *Home SOS* argues that the home is central to the violence and gendered contingency of existence in crisis ordinary Cambodia. Provides an original book-length study which brings domestic violence and forced eviction into twin view Offers relational insights between different violences to build an integrated understanding of women's experiences of home life Mobilises the crisis ordinary as a critical pedagogy and imaginary through which to understand everyday gendered politics of survival Positions domestic violence and forced eviction as manifestations of intimate war against women's homes and bodies located inside and outside of the traditional purview of war Reaffirms and reprioritises the home as a political entity which is foundational to the concerns of human geography

## **Tourism and Gender-based Violence**

### **Essentials of Organizational Behavior**

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

### **Sexual Harassment and Abuse in Sport**

### **Images of Organization**

The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

## **Organizational Behavior Modification and Beyond**

This book is an accessible guide to caring for survivors of sexual and gender-based violence (SGBV). Sexual violence is broadly defined in order to include sexual assault, but also often forgotten subjects such as female genital cutting, sex trafficking, and military sexual violence. The average practitioner, gynecologist or otherwise, will undoubtedly encounter a victim of some sexual violence during their time in practice and this guide is designed to answer all questions on how to approach, treat, and understand a survivor of sexual violence. Written by a multidisciplinary team of medical, psychological, and legal experts, the book is organized into four sections. The first section begins with a scholarly analysis of trauma and how to discuss that trauma with patients. The second section covers types of violence and populations at risk, including intimate partner violence, sex trafficking, and LGBTQ considerations. The third section provides critical focus on the examination procedure, providing strategies for speaking to survivors and conducting a sensitive medical examination. Within each of these chapters, the reader will find experts sharing their tips, best practices, and understandings of exactly how trauma affects care. The final section covers medicolegal legal issues, providing a basic introduction to general legal processes regarding sexual violence matters in the US in order to serve as a resource for any practitioner presented with legal questions by a patient. This book gives a comprehensive overview of clinical care for survivors of SGBV. The clinical focus of this book goes beyond emergency room and crisis intervention protocol described in other books and makes it an ideal guide for all general health practitioners treating this population.

## **Theorizing Gender Violence**

Taking an anthropological perspective, this comprehensive book offers a highly readable and concise overview of what constitutes gender violence, its social context, and important directions in intervention and reform. Uses stories, personal accounts, case studies and a global perspective to provide a vivid and engaging portrait of forms of violence in gendered relationships Extensively covers many forms of gender violence including domestic violence, rape, murder, wartime sexual assault, prison and police violence, female genital cutting, dowry murders, female infanticide, "honor" killings, and sex trafficking Examines major approaches to diminishing gender violence such as criminalization, batterer retraining programs, and human rights interventions Highlights the role of social movements in defining the problem and mobilizing reforms in the US and internationally

## **Global guidance on addressing school-related gender-based violence**

Worldwide, patterns of violence against women differ markedly from violence against men. For example, women are more likely than men to be sexually assaulted or killed by someone they know. The United Nations has defined violence against women as "gender-based" violence, to acknowledge that such violence is rooted in gender inequality and is often tolerated and condoned by laws, institutions, and community norms. Violence against women is not only a profound violation of human rights, but also a costly impediment to a country's national

development. While gender-based violence occurs in many forms throughout the life cycle, this review focuses on two of the most common types-physical intimate partner violence and sexual violence by any perpetrator. Unfortunately, the knowledge base about effective initiatives to prevent and respond to gender-based violence is relatively limited. Few approaches have been rigorously evaluated, even in high-income countries. And such evaluations involve numerous methodological challenges. Nonetheless, the authors review what is known about more and less effective-or at least promising-approaches to prevent and respond to gender-based violence. They present definitions, recent statistics, health consequences, costs, and risk factors of gender-based violence. The authors analyze good practice initiatives in the justice, health, and education sectors, as well as multisectoral approaches. For each of these sectors, they examine initiatives that have addressed laws and policies, institutional reforms, community mobilization, and individual behavior change strategies. Finally, the authors identify priorities for future research and action, including funding research on the health and socioeconomic costs of violence against women, encouraging science-based program evaluations, disseminating evaluation results across countries, promoting investment in effective prevention and treatment initiatives, and encouraging public-private partnerships.

### **Gender-Based Violence**

"This work looks to increase awareness of sexual abuse in sports. Topics covered include the experiences of elite female athletes, sexual harassment of women in athletics as compared to the world of academia, the prevalence of sexual abuse in organized competitive sports in Australia, and defining appropriateness in coachathlete sexual relationships."

### **Understanding Violence Against Women**

8. Challenging the state.

### **The Oxford Handbook of Transnational Feminist Movements**

### **Gender-based Violence**

### **Responding to Intimate Partner Violence and Sexual Violence Against Women**

Over two thirds of women in Botswana (67%) have experienced some form of gender violence in their lifetime including partner and non-partner violence. A smaller, but still high, proportion of men admit to perpetrating violence against women. Inspired by the Commonwealth Plan of Action on Gender and Development (2005-2015) and Southern African Development Community (SADC) Protocol on Gender and Development target of halving GBV by 2015, this research project provides the first comprehensive and comparative baseline assessment of the extent, effects and response to GBV in Botswana. A representative sample of 639

women and 590 men across Botswana completed questionnaires in their preferred local language on behaviour and experiences related to GBV. Researchers asked women about their experience of violence perpetrated by men while men were asked about their perpetration of violence against women.

### **Global and Regional Estimates of Violence Against Women**

This report documents the dynamics of violence against women in South Asia across the life cycle, from early childhood to old age. It explores the different types of violence that women may face throughout their lives, as well as the associated perpetrators (male and female), risk and protective factors for both victims and perpetrators, and interventions to address violence across all life cycle stages. The report also analyzes the societal factors that drive the primarily male — but also female — perpetrators to commit violence against women in the region. For each stage and type of violence, the report critically reviews existing research from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, supplemented by original analysis and select literature from outside the region. Policies and programs that address violence against women and girls are analyzed in order to highlight key actors and promising interventions. Finally, the report identifies critical gaps in research, program evaluations, and interventions in order to provide strategic recommendations for policy makers, civil society, and other stakeholders working to mitigate violence against women in South Asia.

### **Organizational Behavior**

The management of organizational behavior is a critically important source of competitive advantage in today's organizations. Managers must be able to capitalize on employees' individual differences as jobs are designed, teams are formed, work is structured, and change is facilitated. This textbook, now in its third edition, provides its readers with the knowledge required to succeed as managers under these circumstances. In this book, John Wagner and John Hollenbeck make the key connection between theory and practice to help students excel as managers charged with the task of securing competitive advantage. They present students with a variety of helpful learning tools, including:

- Coverage of the full spectrum of organizational behavior topics
- Managerial models that are based in many instances on hundreds of research studies and decades of management practice - not the latest fad
- Completely new introductory mini-cases and updated examples throughout the text to help students contextualize organizational behavior theory and understand its application in today's business world

This ideal book for upper-level undergraduate and postgraduate students of organizational behavior is written to motivate exceptional student performance and contribute to their lasting managerial success. Online resources, including PowerPoint slides and test banks, round out this essential resource for instructors and students of organizational behavior.

### **Preventing and Responding to Gender-based Violence in Middle and Low-income Countries**

## **Gender, Sexuality and Violence in Organizations**

"World Health Organization, London School of Hygiene and Tropical Medicine, South African Medical Research Council"--Title page.

### **Violence against Women and Girls**

Concise, practical, and based on the best available research, *Essentials of Organizational Behavior: An Evidence-Based Approach*, Second Edition equips students with the necessary skills to become effective leaders and managers. Author Terri A. Scandura uses an evidence-based approach to introduce students to new models proven to enhance the well-being, motivation, and productivity of people in the work place. Experiential exercises, self-assessments, and a variety of real-world cases and examples provide students with ample opportunity to apply OB concepts and hone their critical thinking abilities. New to this Edition A new Emotions and Moods chapter delves into important topics like emotional intelligence, emotional contagion, and affective neuroscience. A new Power and Politics chapter unpacks the most effective influence strategies and helps students develop their political skills. A streamlined table of contents now combines perception and decision making in a single chapter and change and stress in a single chapter. New case studies, including some from SAGE Business Cases for the Interactive eBook, on topics such as virtual teams, equal pay and the gender wage gap, and the use of apps at work introduce timely and relevant discussions to help foster student engagement. The new edition has been rigorously updated with the latest research throughout and includes expanded coverage of Machiavellian leadership, ethical decision making, and organizational design through change. New Best Practices and Research in Action boxes as well as new Toolkit Activities and Self-Assessments have been added to make the text even more hands-on and practical.

### **The Gender Based Violence Indicators Study**

Intended to assist academic librarians and other information professionals in better exploiting the information resources available through the National Technical Information Service (NTIS), this two-part manual offers practical suggestions and strategies for making NTIS information services and products available through academic libraries. Suggestions to increase academic librarians' awareness of and access to NTIS services and products are offered in the first section of the manual, including development of a knowledge base of NTIS services and products; taking into account the basic considerations of access, bibliographic control, and microfiche use; development of collections of NTIS materials; promotion of NTIS materials within and outside the library; development of an NTIS service plan; and increasing the use of NTIS materials. This portion of the text is supplemented with 6 figures, and 21 references are provided. The second part of the manual, which identifies core collections of NTIS reports, reference materials, microfiche, diskettes, and magnetic tapes within 16 major subject areas, is intended to help librarians in any setting determine which NTIS titles are significant for particular subject areas and to allow librarians to better integrate NTIS materials into their collections. Indexes by NTIS document title and by order number are included.

Instructions for searching OCLC for NTIS materials and an NTIS order form are appended. (KM)

### **Exchange on HIV/AIDS, Sexuality and Gender**

#### **Changing Cultural and Social Norms that Support Violence [electronic Resource]**

A health-care provider is likely to be the first professional contact for survivors of intimate partner violence or sexual assault. Evidence suggests that women who have been subjected to violence seek health care more often than non-abused women, even if they do not disclose the associated violence. They also identify health-care providers as the professionals they would most trust with disclosure of abuse. These guidelines are an unprecedented effort to equip healthcare providers with evidence-based guidance as to how to respond to intimate partner violence and sexual violence against women. They also provide advice for policy makers, encouraging better coordination and funding of services, and greater attention to responding to sexual violence and partner violence within training programmes for health care providers. The guidelines are based on systematic reviews of the evidence, and cover: 1. identification and clinical care for intimate partner violence 2. clinical care for sexual assault 3. training relating to intimate partner violence and sexual assault against women 4. policy and programmatic approaches to delivering services 5. mandatory reporting of intimate partner violence. The guidelines aim to raise awareness of violence against women among health-care providers and policy-makers, so that they better understand the need for an appropriate health-sector response. They provide standards that can form the basis for national guidelines, and for integrating these issues into health-care provider education.

### **The Management of Organizations**

The authors examine good practice approaches in justice, health, education, and multisectoral approaches. In each sector, they identify good practices for: (1) law and policies; (2) institutional reforms; (3) community-level interventions; and (4) individual behavior change strategies. The authors offer conclusions and recommendations for future work on gender-based violence: It is essential to focus on the prevention of GBV, not just on services for its survivors. Prevention is best achieved by empowering women and reducing gender disparities, and by changing norms and attitudes which foster violence. Interventions should employ a multisectoral approach and work at different levels--individual, community, institutional, and laws and policies. GBV may be common in the Latin America and the Caribbean region, but there are promising approaches available to begin working toward its elimination"--Abstract.

### **Researching Violence Against Women**

Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and

medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. *Violence in Families* takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. *Violence in Families* provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. *Violence in Families* discusses issues that underlie all types of family violence, such as the tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, *Violence in Families* synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

### **Violence in Families**

*Theorizing Gender Violence* introduces students to critical sociological theories used to understand and respond to gender violence. The text emphasizes feminist theory and demonstrates how other theories have supported, challenged, and expanded upon feminist theory to shape and enrich various approaches to and perspectives regarding the subject. The text examines multiple types of gender violence, including physical, psychological, emotional, and sexual, as well as a range of contexts of violence, including domestic violence, campus sexual assault, stalking, and more. Dedicated chapters examine theories commonly used by researchers and practitioners, including Johnson's typology, male peer support theory, intersectionality, queer theory, ecological frameworks, and routine activities theory. For each, students read a vignette, learn the background of the theory, examine an analysis of the theory, and then engage more deeply with the material through reflection questions, a case example, and a reflection contributed by a scholar in the field. The text concludes by summarizing the theories, identifying their similarities and differences, and discussing the current state and the future of the field. *Theorizing Gender Violence* is part of the Cognella Series on Family and Gender-Based Violence, an interdisciplinary collection of textbooks featuring cross-cultural perspectives, cutting-edge strategies and interventions,

and timely research on family and gender-based violence.

### **Sexual and Gender-Based Violence**

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

### **Academic Library Use of NTIS**

"This book focuses on the multiple and interconnected manifestations of violence that women/girls encounter in tourism consumption and production while seeking to open the debate on violence against sexual minorities (LGBT) and discussing men/boys as victims and perpetrators of GBV"--

### **Humanitarian Assistance**

Applying Anthropology to Gender-Based Violence: Global Responses, Local Practices addresses the gaps in theory, methods, and practices that are currently used to engage the problem of gender-based violence. This book complements the work carried out in the legal, social work, and medical fields by demonstrating how a focus on local issues and local responses can better inform a collaborative global response to the problem of gender-based violence. With chapters covering Africa, Asia, Latin and North America, and Oceania, it provides ample evidence that richly textured and qualitatively informed research can illuminate work that is more quantitative in scope. The volume illustrates the various ways scholars, practitioners, frontline workers, and policy makers can work together to end forms of violence in their local communities. The chapters in this volume demonstrate that the ways top-down responses to violence have been inadequate, and that solutions are available when the local historical, political, and social context is taken into consideration. Applying Anthropology to Gender-Based Violence contains useful insights that, when combined with the efforts of other disciplines, offer solutions to the problem of gender-based violence.

### **Violence Against Women**

`This exceptionally interesting study provides an up-to-date and integrated perspective on organizations, violence, gender and sexuality. It pays particular attention to the power wielded by hierarchies of heterosexual men, and the ways in which this produces violence in different, carefully analyzed forms. This book is a major contribution to the construction of sociological and political knowledge that

is not founded on the dominant definitions of heterosexual masculinities' - Professor Terrell Carver, University of Bristol `This is a wide-ranging and authoritative book. The authors draw attention to the huge amount of evidence now available that documents the gendering and sexualising processes at the core of organisational life. While they never nag about violation and inequality, they are nonetheless relentless in confronting the reader with the weight of evidence'- Professor Rosemary Pringle, University of Southampton This book brings together the themes of gender, sexuality, violence and organizations. The authors synthesize the literature and research which has been done in these fields and provide a coherent framework for understanding the interrelationship between these concepts. The importance of violence and abuse, and particularly men's violence to women, children and other men has been well established, especially through feminist and some pro-feminist research. The insights of this scholarship have rarely been applied to organizational analysis. The authors draw on this literature and their own research, as well as relevant literatures on safety and risk at work; anxiety and stress at work; organizational policies on violence; sexual harassment and bullying in organizations; and male sexuality, to provide valuable information on violence in and around organizations. Gender, Sexuality and Violence in Organizations breaks new ground in organization studies and will be essential reading for academics and students in both organization studies and all those studying issues of gender and sexuality in organizations.

### **World Report on Violence and Health**

Draws on the collective experiences and insights of many individuals, and in particular from the implementation of the WHO Multi-country Study on Women's Health and Domestic Violence against Women in over 10 countries. Twenty years ago, violence against women was not considered an issue worthy of international concern. Gradually, violence against women has come to be recognized as a legitimate human rights issue and as a significant threat to women's health and well-being. Now that international attention is focused on gender-based violence, methodologically rigorous research is needed to guide the formulation and implementation of effective interventions, policies, and prevention strategies. The manual has been developed in response to the growing need to improve the quality, quantity, and comparability of international data on physical and sexual abuse. It outlines some of the methodological and ethical challenges of conducting research on violence against women and describes a range of innovative techniques that have been used to address these challenges.

### **Male Roles, Masculinities and Violence**

Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? Understanding Violence Against Women presents a comprehensive overview of current knowledge and identifies four areas

with the greatest potential return from a research investment by increasing the understanding of and responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. Understanding Violence Against Women provides direction for increasing knowledge that can help ameliorate this national problem.
