The Demo Docs System of instruction replicates the classroom experience by providing more "I get it" moments outside of class. We've talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or "get it") right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. & On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. & The Demo Docs system helps to recreate the "I get it" moments outside of class-keeping both you and the students on track.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 12e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet.

writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.
