Cancer cell biology research in general, and anti-cancer drug development specifically, still relies on standard cell culture techniques that place the cells in an unnatural environment. As a consequence, growing tumor cells in plastic dishes places a selective pressure that substantially alters their original molecular and phenotypic properties. The emerging field of regenerative medicine has developed bioengineered tissue platforms that can better mimic the structure and cellular heterogeneity of in vivo tissue, and are suitable for tumor bioengineering research. Microengineering technologies have resulted in advanced methods for creating and culturing 3-D human tissue. By encapsulating the respective cell type or combining several cell types to form tissues, these model organs can be viable for longer periods of time and are cultured to develop functional properties similar to native tissues. This approach recapitulates the dynamic role of cell-cell, cell-ECM, and mechanical interactions inside the tumor. Further incorporation of cells

representative of the tumor stroma, such as endothelial cells (EC) and tumor fibroblasts, can mimic the in vivo tumor microenvironment. Collectively, bioengineered tumors create an important resource for the in vitro study of tumor growth in 3D including tumor biomechanics and the effects of anti-cancer drugs on 3D tumor tissue. These technologies have the potential to overcome current limitations to genetic and histological tumor classification and development of personalized therapies.

Long popular with students who have used it, Popping Culture presents a compilation of articles dealing with current issues in popular culture, including media violence, sexuality, social inequality, racism, and war. Some of the leading theorists in cultural studies today, including Stuart Ewen, Mark Crispin Miller, William Hoynes, Henry Giroux and Christopher Sharrett among others, take on these subjects with a critical perspective aimed at "popping" the conceptual bubbles that surround them. The articles are organized around central themes and

issues in popular culture today: social class, gender, violence, ideology, and race.

Winner of the T. S. Eliot Prize, "essential reading for the broken-hearted of all ages" (The Guardian) The effortless virtuosity, drama, and humanity of Carol Ann Duffy's verse have made her much admired among contemporary poets. Rapture is a book-length love poem and a moving act of personal testimony. But what sets these poems apart from other treatments of the subject is Duffy's refusal to simplify the contradictions of love and read its transformations-infatuation, longing, passion, commitment, rancor, separation, and grief-as either redemptive or destructive. This is a map of real love in all its churning complexity, simultaneously direct and subtle, showing us that a song can be made of even the most painful episodes in our lives. With poems that will find deep resonance in the experience of most readers, it is a collection that can and does speak for us all.

"Deliciously Stella is not your average clean-eating superfoodie. Malibu is her favourite brand of coconut water, and she would rather turn her pictures upside down than brave a headstand. She's not a chef or a nutritionist, but in this day and age who needs to be? Anything can be a recipe if you put the right filter on it. After taking Instagram by storm, her first book shows you how to #gettheglow in the time it takes you to massage your kale. Her recipes include a refreshing cucumber salad with gin and quinine dressing and her classic chocolate abundance bowls. Deliciously Stella will leave you feeling energized, #blessed and ready to hashtag your way to health."--Back cover.

This study, the focus of which is the transitional period from late Predynastic to early Dynastic times, seeks to establish a reliable and refined framework of local chronologies, for the purpose of investigating the complex socio-economic changes which took place. It also seeks to examine the origins of the the trend towards political unification of the country. With reference to mortuary data, a full explanation is offered of the techniques of seriation and statistical analysis, and typological criteria as applied to seven cemeteries in the Nile valley. Wilkinson

supplies a summary of recent advances in understanding the evidence uncovered, and the issues left to be pursued. Controls are presented to chart alongside the principal ceramic phases, and appendices give details of the pottery groups employed. An extended essay in Part 5 completes the picture by discussing Delta communities of some significance just lately brought to light.

SAT Subject Tests are a valuable way to help students show colleges a more complete picture of their academic background and interests. Each year, over 200K high school students take a math SAT Subject Test to demonstrate their knowledge and showcase their achievement. Many of today's careers require STEM skills, and SAT Subject Tests can provide a fair and reliable measure of students' achievement in math in high school. This information can often enhance a student's college admission portfolio. Several colleges and universities also require or recommend students to take SAT Subject Tests for admission and/or placement. The Official SAT Subject Test in Mathematics Level 2 Study Guide from the College Board is the only source of official questions and answer explanations for these exams. Created from the makers of the Subject Tests, this guide offers a total of four (two never-been released) forms of real past Math exams for students to gain real practice. Students will gain valuable experience and raise their confidence by taking practice tests, learning about test structure, and gaining a deeper understanding of what is tested on the test. The Official SAT Subject Test in Mathematics Level 2 Study Guide will help students get ready for the test with:

- 4 full-length, previously administered tests in Math Level 2
