### The Know-It-All's Guide to Life

Navigating the Journey of Aging Parents proposes an entirely unique approach to the field of gerontology, giving dependent care receivers a voice. Caregivers will be made aware of what care receivers truly want during life's final chapters. Exploring issues of housing, spirituality, personal care and death, Cheryl Kuba has created a testament to the dependent elderly. This book draws on numerous interviews with aging people and discusses common caregiver mistakes and interpretations, what a caregiver should expect when an aging parent moves in, and how to care for an aging parent from afar. Kuba also delves into such phenomena as guilt, role reversal, changing family dynamics, financial stress, and caring for oneself while caring for another. The 22.4 million elderly people being cared for in the United States comprises the fastest growing segment of the population, making this reference on the opinions and concerns of care receivers invaluable.

### Secrets the Trucking Companies Don't Want You to Know!

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller Made to Stick. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In Switch, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was

endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

John H. Croom, III is a retired chief executive of one of the nation's largest natural gas companies. In his auto-biography, *Getting to Know Me*, he relates stories of his family and childhood in his native North Carolina, his decision to be a professional engineer, and events throughout his adult working life, that took him north for almost fifty years, before retiring to his native state. Of special note, he expands on the interplay of marketing competition, regulation and politics in the natural gas business. His book concludes with his reflections on forces and natural occurrences that shaped his life, his career and his retirement.

### **The Manual to Manhood**

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

### **School Bus Driver's Handbook**

This instructor's manual was designed to help graduates of the California Bus Driver Instructor Course provide effective instruction to school bus driver trainees. It contains enough material for 20-30 hours of classroom training. The information is organized in 12 instructional units that cover the following topics: introduction to the course; driver's license and special certificate requirements; bus operation, use, laws, and regulations; vehicle components; general defensive driving techniques; specialized defensive driving techniques; passenger loading and unloading; emergency procedures; passenger management; activity trips; the special needs passenger; and public and community relations. Each unit includes an outline of the lesson plans in it, notes to the instructor, content information, handouts, and pretests and unit test. A final unit of the guide provides additional information for the instructor on teaching the course, such as materials needed to conduct classes, classroom arrangement, lesson planning and teaching techniques, and tests and answer keys. Liberation, lust, envy, rage, power, thrill—our cars provoke enough emotion to jam a six-lane highway. If you name your ride, reminisce about sex in the back seat or enjoy roaring down the open road, you know why we love our wheels. But if you hate traffic, curse at the price at the pump or fight over parking spaces, you know why we hate them too. Drive is a cross-continent adventure that explores where our fuel-injected dreams have taken us. Award-winning journalist Tim Falconer invites us on his road trip as he meets vintage car enthusiasts on Route 66, rides along in a police cruiser, kicks the tires at a Las Vegas auto show and takes a hydrogen-powered car for a spin. Steering us along North America's interstates and blue highways, meandering through small towns, sprawling suburbs and walkable neighbourhoods, Falconer shows us the growing collision of cars and people. In this complicated affair, who's really in the driver's seat? Can smart growth, public transit and complete streets free us? A spirited, front-seat view of quirky locals and locales, Drive looks at what auto-dominated life means to our health, environment

and communities. Falconer also opens the door on British and Argentine car cultures, and considers the road ahead for China and India, nations with increasingly American attitudes. As billions grab their keys, can we avoid carnageddon? "[A] fascinating survey of the automobile and its effect on society ... A fun book about a serious topic." —Winnipeg Free Press "Essential reading for any Canadian intrigued by the conundrum of finding better ways to get from here to there." —Spacing magazine

The Clinician's Guide to ADHD combines the useful diagnostic and treatment approaches advocated in different guidelines with insights from other sources, including recent literature reviews and web resources. The aim is to provide clinicians with clear, concise, and reliable advice on how to approach this complex disorder. The guidelines referred to in compiling the book derive from authoritative sources in different regions of the world, including the United States, Canada, Australia, and Europe. After introductory discussion of epidemiology and etiology, guidance is provided on diagnosis in different age groups, differential diagnosis, assessment for potential comorbidities, and the issue of ADHD and driving. Advice is then given on the appropriate use of pharmacological and psychosocial treatment, the management of adverse events, and follow-up. A series of relevant scales, questionnaires, and websites are also included.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

You may not realize it but simple, irrelevant factors can have profound consequences on your decisions and behavior, often diverting you from your original plans and desires. Sidetracked will help you identify and avoid these influences so the decisions you make do stick—and you finally reach your intended goals. Psychologist and Harvard Business School professor Francesca Gino has long studied the factors at play when judgment and decision making collide with the results of our choices in real life. In this book she explores inconsistent decisions played out in a wide range of circumstances—from our roles as consumers and employees (what we buy, how we manage others) to the choices that we make more broadly as human beings (who we date, how we deal with friendships). From Gino's research, we see when a mismatch is most likely to occur between what we want and what we end up doing. What factors are likely to sway our decisions in directions we did not initially consider? And what can we do to correct for the subtle influences that derail our decisions? The answers to these and similar questions will help you negotiate similar factors when faced with them in the real world. For fans of Dan Arieli and Daniel Kahneman, this book will help you better

understand the nuances of your decisions and how they get derailed—so you have more control over keeping them on track.
