Advances in Engineering Education in the Middle East and North Africa

Proceedings

This book provides a collection of the latest advances in engineering education in the Middle East and North Africa (MENA) region and sheds insights for future development. It is one of the first books to address the lack of comprehensive literature on undergraduate engineering curricula, and stimulates intellectual and critical discourse on the next wave of engineering innovation and education in the MENA region. The authors look at recent innovations through the lens of four topics: learning and teaching, curriculum development, assessment and accreditation, and challenges and sustainability. They also include analyses of pedagogical innovations, models for transforming engineering education, and methods for using technological innovations to enhance active learning. Engineering education topics on issues such as construction, health and safety, urban design, and environmental engineering in the context of the MENA region are covered in further detail. The book concludes with practical recommendations for implementations in engineering education. This is an ideal book for engineering education academics, engineering curriculum developers and accreditation specialists, and deans and leaders in engineering education.

National Educators' Workshop: Update 1993. Standard Experiments in Engineering Materials Science and Technology

In May 1998, a 4-day workshop was held to consider the role of mechanical plaque control, whether supplemented with chemical agents or not, in the prevention and treatment of dental caries and periodontitis. The proceedings of this workshop should serve as a follow-up to those of the NIDR's landmark 1985 workshop, until now widely regarded as the definitive source for state-of-the-science information on this important issue. The 1998 proceedings combines the reports of all four sessions, including all position papers, consensus reports, and policy statements. An excellent resource for clinicians and dental hygienists alike. [editor].
