Minority-targeted scholarships, for which some form of minority status is an eligibility requirement, have become controversial in recent years. This report examines the use and perceived value of minority-targeted scholarships by undergraduate, graduate, and professional schools. It found that minority-targeted scholarships accounted for a small proportion of total scholarships and scholarship dollars in academic year 1991-92. However, race or ethnicity was rarely the sole criterion; most minority-targeted scholarships used additional criteria, such as financial need or academic merit, for awarding funds. Charts and tables.

The Scholarship Handbook 1999

Lists federal funding programs available to rural areas which were selected from the Catalog of Federal Domestic Assistance 1997. Provides extensive listings of federal assistance programs; national, regional, and local office contacts; and grant application procedures, from: the Appalachian Regional Comm.; Depts. of Agriculture, Commerce, Defense,

Education, and Energy; EPA; FEMA; Depts. of Health and Human Services, Justice, Labor, Interior, and Transportation; HUD; NEA; National Foundation on the Arts and the Humanities; SBA; TVA; and the Corporation for National and Community Service.

The Successful Match 2017

Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In Debt-Free Degree, Anthony ONeal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents: *How to prepare their child for college *Which classes to take in high school *How and when to take the ACT and SAT *The right way to do college visits *How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. Debt-Free Degree shows parents how to pay cash for college and set their child up to succeed for life.

The Premed Playbook: Guide to the Medical School Interview is the only book needed to prepare premed students for their medical school interviews. Through interviews with Admissions Committee members and others, Dr. Gray has compiled the most comprehensive book on this subject. Premed students want to know what to expect, but more importantly they need to see examples of what successful applicants have done. The Premed Playbook not only gives them close to 600 potential interview questions, it also gives them real answers and feedback from interview sessions that Dr. Gray has held with students.

Getting into Medical School For Dummies

Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature

Praise For *The White Coat Investor* "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S. Roth, MBA, CPA, CFP(R), Author of *How a Second Grader Beats Wall Street* "Jim Dahle has done a lot of thinking about the peculiar financial problems facing physicians, and you, lucky reader, are about to reap the bounty of both his experience and his research." - William J. Congressional Record

Tax Planning and Compliance for Tax-Exempt Organizations

Black men are increasingly underrepresented in medical schools and in the medical profession. A diverse workforce is a key attribute of quality healthcare and research suggests that a diverse workforce may help to advance cultural competency and increase access to high-quality health care, especially for underserved populations. Conversely, lack of diversity in the health workforce threatens health care quality and access and contributes to health disparities. In this way, the growing absence of Black men in medicine is especially troubling, because their absence in medicine may have adverse consequences for health care access, quality, and outcomes among Black Americans and Americans overall. To better understand the factors that contribute to the low participation of Black men in the medical profession, facilitate discussion of current strategies used to increase their participation in medical education, and explore new strategies along the educational and professional pipeline that may have potential to increase participation in medicine, the National Academies of Sciences, Engineering, and Medicine and the Cobb Institute jointly convened a 2-day workshop in November 2017, in Washington, DC. This publication summarizes the presentations and discussions from the workshop.

Robert Neil Butler (1927–2010) was a scholar, psychiatrist, and Pulitzer Prize-winning author who revolutionized the way the world thinks about aging and the elderly. One of the first psychiatrists to engage with older men and women outside of institutional settings, Butler coined the term "ageism" to draw attention to discrimination against older adults and spent a lifetime working to improve their status, medical treatment, and care. Early in his career, Butler seized on the positive features of late-life development—aspects he documented in his pathbreaking research on "healthy aging" at the National Institutes of Health and in private practice. He set the nation's age-based health care agenda and research priorities as founding director of the National Institute on Aging and by creating the first interprofessional, interdisciplinary department of geriatrics at New York City's Mount Sinai Hospital. In the final two decades of his career, Butler created a global alliance of scientists, educators, practitioners, politicians, journalists, and advocates through the International Longevity Center. A scholar who knew Butler personally and professionally, W. Andrew Achenbaum follows this pioneer's significant contributions to the concept of healthy aging and the notion that aging is not synonymous with physical and mental decline. Emphasizing the progressive aspects of Butler's approach and insight, Achenbaum affirms the ongoing relevance of his work to gerontology, geriatrics, medicine, social work, and related fields.

This book can save you more than \$100,000. These days, most people assume you need to pay a boatload of money for a

quality college education. As a result, students and their parents are willing to go into years of debt and potentially sabotage their entire financial futures just to get a fancy name on their diploma. But Zac Bissonnette is walking proof that this assumption is not only false, but dangerous—a class con game designed to rip you off and doom your student to a post-graduation life of near poverty. From his unique double perspective—he's a personal finance expert (at Daily Finance) AND a current senior at the University of Massachusetts—Zac figured out how to get an outstanding education at a public college, without bankrupting his parents or taking on massive loans. Armed with his personal knowledge, the latest data, and smart analysis, Zac takes on the sacred cows of the higher education establishment. He reveals why a lot of the conventional wisdom about choosing and financing college is not only wrong but hazardous to you and your child's financial future. You'll discover, for instance, that: * Student loans are NOT a necessary evil. Ordinary middle class families can- and must-find ways to avoid them, even without scholarships. * College "rankings" are useless—designed to sell magazines and generate hype. If you trust one of the major guides when picking a college, you face a potential financial disaster. * The elite graduate programs accept lots of people with non-elite bachelors degrees. So do America's most selective employers. The name on a diploma ultimately won't help your child have a more successful career or earn more money. Zac can prove every one of those bold assertions - and more. No matter what your current financial situation, he has a simple message for parents: "RELAX! Your kid will be able to get a champagne education on a beer budget!"
