Designed by coders for coders, this full-color manual ensures you learn the most accurate billing and reimbursement codes for medical services provided in the physicians' office and out-patient settings. General Transcription is a new opportunity for anyone who desires to have their own business. However, there is a lack of style guides available for transcriptionists who are not working in a medical or legal field. Every individual and company offering general transcription services has their own preferences, their own rules. There are no standards. The goal of this guide is to set basic standards of formatting, grammar, and punctuation as it pertains to general transcription. The General Transcription Style Guide answers questions such as: Should I indicate laughter or other noises in a transcript? How do I indicate words that I can't quite hear? What punctuation marks should I never use in a transcript? The General Transcription Style Guide is based on the personal experience of a general transcriptionist who has worked with private individuals and companies for four years. The guide is based on common transcription needs and preferences of a variety of clients. It can be used for both verbatim and non-verbatim transcription. This guide is not exclusive. All transcription companies and private clients may have their own preferences. Always follow the preferences of your client or the company you are subcontracting for.

A quick reference for the medical transcriptionist, this book provides basic rules of grammar as well as current trends in the field. It's especially useful in searching for help with an obscure rule or in reinforcing a common practice. Using short chapters, this text provides the Do's - the grammatical rule, its exceptions, and its variations, along with examples; and the Don'ts - any common contradictions of that rule. Examples are taken from medical writing rather than general writing. Easy-to-use format provides numbered topics in each chapter, which are followed by Do's and Don'ts in quick, easy sentences. Spiral binding allows book to lay flat so MT's can refer to a rule without taking their hands off the keyboard. Clear examples are given to clarify difficult-to-understand concepts and rules. HIPAA Guidelines chapter provides general information about HIPAA legislation, with rules explaining its impact on topics such as e-mail, faxing, patient records, and privacy/security. Content has been updated to reflect changes in technology (such as use of the Internet), slang terms, and new medical terms that affect the rules of medical transcription. A table lists dangerous abbreviations to avoid, all banned by JCAHO. Homonyms and Sound-alike Words in the appendix focus on the many homonyms in medical language that can confuse a medical transcriptionist and cause a document to be transcribed incorrectly, leading to incorrect treatment of the patient. Appendices are lettered and thumb-tabbed for ease of use, to differentiate from the body of the text. Content reflects the AAMT style, the standard among major employers of medical transcriptionists.
