The essays in this volume explore the borderland between ecology and the arts. Nature is here read by a number of contributors as 'cultural', by others as an 'independent domain', or even as a powerful process of exchange 'between the human and the other-than-human'. The four parts of the volume reflect these different understandings of nature and performance. Informed by psychoanalysis and cultural materialism, contributors to the first part, 'Spectacle: Landscape and Subjectivity', look at ways in which particular social and scientific experiments, theatre and film productions and photography either reinforce or contest our ideas about nature and human-human or human-animal relations and identities. The second part, 'World: Hermeneutic Language and Social Ecology', investigates political protest, social practice art, acoustic ecology, dance theatre, family therapy and ritual in terms of social philosophy. Contributors to the third part, 'Environment: Immersiveness and Interactivity', explore architecture and sculpture, site-specific and mediated dance and paratheatre through radical theories of urban and virtual space and time, or else phenomenological philosophy. The final part, 'Void: Death, Life and the Sublime', indicates the possibilities in dance, architecture and animal behaviour of a shift to an existential ontology in which nature has 'the capacity to perform itself'.

Formerly 'Automotive Brake Systems'. 2nd Edition. Safety is very important in vehicle design and operation. Driving-Safety Systems is the new edition of what was formerly titled 'Automotive Brake Systems'. The title has been changed to reflect the addition of information on recent technological advancements in safety systems beyond braking systems such as traction control systems (TCS) and electronic stability control (ESP). Ideal for engineers, technicians and enthusiasts, this book offers a wide range of detailed and easy-to-understand descriptions of the most important control systems and components. A new section on electronic stability has been added, and sections on driving physics, braking systems basics and braking systems for passenger cars and commercial vehicles have been updated. Contents include: Driving Safety in the Vehicle Basics of Driving Physics Braking-System Basics Braking Systems for Passenger Cars Commercial Vehicles - Basic Concepts, Systems and Diagrams Compressed Air Equipment Symbols Equipment for Commercial Vehicles Brake Testing Electronic Stability Program ESP.

Barbara Gittings

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Mercedes-Benz E-Class Diesel Workshop Manual

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

The mobile phone has achieved a global presence faster than any other form of information and communication technology. A global multi-billion dollar industry, this small, mundane device is now an intrinsic part of our everyday life. This communications medium has had an immense social and cultural impact and continues to evolve. Talking, texting, photographing, videoing, connecting to a network of other media - the cellphone now seems essential. But, beyond the ways in which it has actively restructured our daily lives, the mobile has changed our sense of ourselves and the way we see the world. The relationship between public and private space, how we view time and space, how we rely on and negotiate social networks - all are increasingly centred on this small piece of technology. Mobile Communications presents a succinct, challenging, and accessible overview of the transformations and challenges presented by this most personal, yet most overlooked technology.

Mercedes-Benz E-class Owner's Bible, 1986-1995

Barbara Gittings: Gay Pioneer is the first full-length biography of the woman who

has been called the mother of the gay-rights movement, Barbara Gittings. Her work in the LGBT movement spanned from the late 1950s until her death in 2007. Her partner in life, Kay Lahusen, photographed many of the movement's biggest actions during the 1960s, and more than 270 photos accompany this biography. This book is available in both color and B&W editions, and in color on Kindle by July 2015. Gittings was active in a wide range of pre- and post-Stonewall groups, including the Daughters of Bilitis. She served as editor of DOB's newsletter, The Ladder. She worked with Frank Kameny on many protests and legal cases fighting government discrimination. She also was among the leaders of the push to change the American Psychiatric Association diagnosis of homosexuality as an illness, and among those pushing the American Library Association to be more inclusive of gays. The book is available in both B&W and color editions on Amazon, and also in color on Kindle. "Baim's book, the first full-length biography of Barbara Gittings, demonstrates why Frank Kameny, who earned the right to be considered a father of the gay civil-rights movement, so aptly deemed Gittings its mother. As Baim shows, more than any lesbian leader of the 20th century, Gittings kept her eyes sharply focused on the prize of civil rights for gay people." - From the Foreword by Lillian Faderman "This first and deeply moving biography of Barbara Gittings, pioneer of lesbian political activism, dramatically evokes a past of open, outrageous anti-homosexual discrimination. Today's radically different world was first imagined and then begun to be built by daring activists like Gittings." - Jonathan Ned Katz, Co-Director, OutHistory.org "Tracy Baim brings Gittings to life in this captivating and inspiring biography. Skillfully combining Gittings' own words with accounts of her activist campaigns, this biography makes clear how much Gittings accomplished. A committed activist for five decades, Barbara Gittings truly changed the world." - Author and Historian John D'Emilio (In a New Century: Essays on Queer History, Politics, and Community Life) "Barbara Gittings just about leaps from the pages of Tracy Baim's celebratory biography of the gay rights movement's happiest warrior. Determined, persistent, persuasive, and wicked-smart, Barbara wielded her smile like a machete, demolishing all demagogues and fools who got in the way of what she knew to be true about herself and the rest of us. How lucky were we that she was born at a time when we so desperately needed her to help blaze our path to freedom." - Eric Marcus, author of Making Gay History "Tracy Baim has captured the life and legacy of the mother of gay liberation in America with this book. Barbara Gittings would have loved it. Another incredible book on our history!" - Reverend Troy Perry "Gittings understood early on the critical role America's libraries would play in changing hearts and minds about gay issues. In an age before the Internet, she dedicated her life to making good information available to all through her leadership in the Gay Task Force of the American Library Association. This powerful biography tells a story that libraries across the nation can celebrate." - John Cunningham, Retired Chief of Branch and Regional Libraries, The Free Library of Philadelphia

You haven't gotten yourself a R107 yet? Too bad, the good ones can cost a small fortune today and they have only one way to go: UP! But don't worry, plenty of them have been built and plenty of them are still around. Problem is, which one is the right one for you? Can you imagine that even a low mileage, good looking R107 can still far exceed your wildest imaginations, when it comes to restoration costs? Everybody seems to want a late model 560SL. Why not an early 450SL for half the money? The joy and pride of ownership is the same, trust me. Or how about one of the former longtime underdogs, an SLC? Also they start to appreciate, a few of them even very fast, faster than a mint 560SL. If any of this is of interest, then this new book (published already earlier as e-book) is for you. It does not only deal with development and history, it also comes with a comprehensive buyer's guide for both the SL and SLC. This includes a look at their price development over the past years. Another focus has been the VIN and data card, so that you have a better understanding, how they were equipped and to which market they have been shipped first. Superb recent photography from the author's collection can help you to find the right car or it might even serve as reference in a restoration project. Naturally the paint and interior upholstery options, full technical details plus the annual production history of each model are covered. As a bonus, rare insights into the R107's almost unknown rally history are given. **FREE BONUS:** When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W111 or W198 or R107 for example) the author has covered in one of his books. Please contact the author through his website (inside the book) and stipulate, which free pdf file you want him to send to you.

Grayson is Lynne Cox's first book since *Swimming to Antarctica* ("Riveting"—Sports Illustrated; "Pitch-perfect"—Outside). In it she tells the story of a miraculous ocean encounter that happened to her when she was seventeen and in training for a big swim (she had already swum the English Channel, twice, and the Catalina Channel). It was the dark of early morning; Lynne was in 55-degree water as smooth as black ice, two hundred yards offshore, outside the wave break. She was swimming her last half-mile back to the pier before heading home for breakfast when she became aware that something was swimming with her. The ocean was charged with energy as if a squall was moving in; thousands of baby anchovy darted through the water like lit sparklers, trying to evade something larger. Whatever it was, it felt large enough to be a white shark coursing beneath her body. It wasn't a shark. It became clear that it was a baby gray whale—following alongside Lynne for a mile or so. Lynne had been swimming for more than an hour; she needed to get out of the water to rest, but she realized that if she did, the young calf would follow her onto shore and die from collapsed lungs. The baby whale—eighteen feet long!—was migrating on a three-month trek to its feeding grounds in the Bering Sea, an eight-thousand-mile journey. It would have to be carried on its mother's back for much of that distance, and was dependent on its mother's milk for food—baby whales drink up to fifty gallons of milk a day. If Lynne didn't find the mother whale, the baby would suffer from dehydration and starve to death. Something so enormous—the mother whale was fifty feet long—suddenly seemed very small in the vast Pacific Ocean. How could Lynne possibly find her? This is the story—part mystery, part magical tale—of what happened . . .

This cookbook was written for all the dogs who rely on their master for all their needs and ask nothing in return. Good nutrition is as important to your dog as it is to you. Cancer is the leading cause of death in dogs and cats today, so the food they ingest is paramount to their health, as well as exercise and annual visits to the veterinarian. This cookbook was written to have fun in the kitchen cooking delicious recipes that your dog will love. He will probably join you in the kitchen when he starts to know that the aroma of good food is for him. P.J.'s Bichon Frise lived to be 22 years old and spunky to the end of her life. P.J. attributes her Bichon Frise's excellent health to the meals she cooked for her, long before the pet food recall scare. You have control of all the ingredients your dog eats. If your dog had to cook for you, don't you think it would give you the best possible food to keep you healthy and living longer? You bet they would. Do you feed your dog the same thing, day after day, week after week? Yuk. This cookbook will get you out of this rut and you will see a happier and healthier dog if you start cooking these easy and fun recipes. The book is also filled with fun facts, dog jokes, dog sayings, astrology, dog breeds, and trivia to make this cookbook a must for you to have. A portion of the proceeds of this book will be donated to the Cancer Society for Animals.

If you search for a car that can hold its own, when parked next to a Porsche 911 Cabrio, don't look any further. Because the SL R230 is regarded by many as the best looking SL that has left Stuttgart after the famous SL Gullwing. On top it is immense fun to drive, with powerful V8s and V12s to match the looks. Like the drive-train they are almost bullet-proof. Early cars suffered from quality problems that could spoil the fun factor somewhat. But all in all the R230 plays its GT role rather well, even with six-cylinder engines. And the AMG versions are true sports cars. This book with comprehensive buyer's guide can help you to find the right one, if the R230 interests you. It was already published as e-book in 2012 and has been completely revised in Nov.2015. The book explains the VIN and data card in great detail, discusses the SBC, ABC systems and looks at potential problems with the vario-roof. Superb photography and an enjoyable test-drive in the splendid SL65 AMG are other highlights. It ends with a detailed list of the cars' technical specifications and annual production history of each model. For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.
