Grandmaster Reuben Fine wrote that Alekhine's collection of best games was one of the three most beautiful that he knew. World Champion Garry Kasparov wrote, "Alexander

Alekhine is the first luminary among the others who are still having the greatest influence on me. I like his universality, his approach to the game, his chess ideas. I am sure that the future belongs to Alekhine chess." Bobby Fischer wrote, "He had great imagination. He could see more deeply into a situation than any other player in chess history. It was in the most complicated positions that Alekhine found his grandest concepts." Chess Journalist Jerry Hanken writes, "The study of this book added 300 points to my rating and made me a master." In 1927, Alekhine became World Chess Champion by defeating Capablanca in a match. He lost the world title to Euwe in 1935 but won it back in 1937. Unlike political or economic institutions, social movements have an elusive power, but one that is no less real. From the French and American revolutions through the democratic and workers' movements of the nineteenth century to the totalitarian movements of today, movements exercise a fleeting but powerful influence on politics and society. This study surveys the history of the social movement, puts forward a theory of collective action to explain its surges and declines, and offers an interpretation of the power of movement that emphasises its effects on personal lives, policy reforms and political culture. While covering cultural, organisational and personal sources of movements' power, the book emphasises the rise and fall of social movements as part of political struggle and as the outcome of changes in political opportunity structure.
