Alcohol and Carbohydrates are very similar chemically, and very likely cause the same allergy of the body and obsession of the mind as with the disease of alcoholism. If alcoholics are able to abstain from a substance they thoroughly craved, abstain for the rest of their lives and learn how to totally enjoy life without it, so can carbohydrate addicts. This book is another of a series of books written anonymously that demonstrate how the principles of spirituality and democracy designed by Bill Wilson, co-founder of Alcoholics Anonymous, can be used outside their anonymous organization for the betterment of our society. However, the principles set down in this book are more austere and the participant will be asked to go to very rigorous lengths to achieve recovery, awaken spiritually and maintain a spiritual experience in this life. The methods described within are designed for people who are desperate, hopeless and

have no where else to turn to. The goal of using this recovery program for the individual is not only to achieve freedom from a high carbohydrate diet, but to achieve a spiritual awakening so that your life can become pleasant, peaceful, happy, and sane.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Simon Dobson's The Dreaded Groove and Hook, is an up tempo acid--jazz work for brass band, drawing its influences from bands such as Jamiroquai and The Youngblood Brass Band. The groove in question is the main tune that is shared around the band soloists and accompanied by 'Stuart Zendor--esque' bass lines, whilst the hook, in pop terms, is the catchy bit of the song. This happens when the whole band join to play a huge 'riff' that acts as a kind of chorus to the jazz like verses. Percussion and soloists alike will have plenty to do in this piece! The piece was commissioned by Jason Katsikaris and The Leyland Band, who gave the first performance as part of their

Mobile phone use in the United States has risen dramatically over the last 20 years, and Americans increasingly rely on mobile phones as their sole or primary means of telephone communication. The rapid adoption of mobile phones has occurred amidst controversy over whether the technology poses a risk to human health. Like other devices that transmit radio signals, mobile phones emit radio-frequency (RF) energy. At high power levels, RF energy can heat biological tissue and cause damage. Though mobile phones operate at power levels well below the level at which this thermal effect occurs, the question of whether long-term exposure to RF energy emitted from mobile phones can cause other types of adverse health effects, such as cancer, has been the subject of research and debate. This book examines what is known about the health effects of RF energy from mobile phones, with a focus on the FCC and FDA's regulatory responsibilities; and other scientific research.
