Texts of the past were often not monolingual but were produced by and for people with bi- or multilingual repertoires; the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations. However, textbooks and earlier research tend to display a monolingual bias. This collected volume on multilingual practices in historical materials, including code-switching, highlights the importance of a multilingual approach. The authors explore multilingualism in hitherto neglected genres, periods and areas, introduce new methods of locating and analysing multiple languages in various sources, and review terminology, theories and tools. The studies also revisit some of the issues already introduced in previous research, such as Latin interacting with European vernaculars and the complex relationship between code-switching and lexical borrowing. Collectively, the contributors show that multilingual practices share many of the same features regardless of time and place, and that one way or the other, all historical texts are multilingual. This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history.

This multilingual dictionary explains, in simple and clear language, the most frequently used terms and expressions in the field of nuclear reactor physics and engineering, and provides translations of these terms from English into French, German, Swedish and Polish. This unique resource offers many advantages over the use of online translation tools, which are often incorrect when dealing with scientific and technical words. Instead, this dictionary has used a wide variety of peer-reviewed books and journal papers to ensure the highest accuracy and establish itself as a reliable and credible reference for the reader. It covers a broad range of exciting topics and the latest developments in the field, including reactor technology, reactor components and systems, reactor operation and control, reactor types, reactor physics, thermal engineering, reactor safety, radiation protection, nuclear fuel, nuclear chemistry, the safeguarding of nuclear materials and much more. This dictionary is kept on a technical level corresponding to

masters-level and PhD studies of nuclear physics and engineering. It will provide the reader with a broad understanding of the necessary information that a researcher or nuclear physicist or engineer would need to possess; therefore, it will be an invaluable resource for students within these and related disciplines. Features: Contains over 1500 key terms from the field The first book to provide translations in five languages: English, French, German, Swedish and Polish Accessible to masters-level and PhD students in addition to early career researchers in nuclear reactor physics and engineering

This book constitutes the proceedings of the 6th International Information Retrieval Facility Conference, IRFC 2013, held in Limassol, Cyprus, October 2013. The 8 papers presented together with 2 short papers were carefully reviewed and selected from 16 high-quality submissions. IRF conferences wish to bring young researchers into contact with industry at an early stage. This sixth conference aimed to tackle four complementary research areas: information retrieval, machine translations for search solutions, and interactive information access.

The papers in this volume are centred on the general field of corpus linguistics and the varying types of language corpora within it. The papers show that corpus linguistics and the related subject of computational linguistics is a vibrant research area with a wide range of approaches. They address a number of key issues in the research areas of learner corpora, parallel corpora, translation, semantic and lexicography, corpus analysis and expert systems. Finally, a number of contributors come from different language backgrounds and this is reflected in

their papers.

The latest developments in data, informatics and technology continue to enable health professionals and informaticians to improve healthcare for the benefit of patients everywhere. This book presents full papers from ICIMTH 2019, the 17th International Conference on Informatics, Management and Technology in Healthcare, held in Athens, Greece from 5 to 7 July 2019. Of the 150 submissions received, 95 were selected for presentation at the conference following review and are included here. The conference focused on increasing and improving knowledge of healthcare applications spanning the entire spectrum from clinical and health informatics to public health informatics as applied in the healthcare domain. The field of biomedical and health informatics is examined in a very broad framework,

presenting the research and application outcomes of informatics from cell to population and exploring a number of technologies such as imaging, sensors, and biomedical equipment, together with management and organizational aspects including legal and social issues. Setting research priorities in health informatics is also addressed. Providing an overview of the latest developments in health informatics, the book will be of interest to all those working in the field.

Looking closely at what happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts, this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation. It extends theoretical understandings of the concept and highlights its promises and challenges. Using a Transformative Action Research design, six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments. The cases shed light on two questions: How, when, and why is translanguaging taken up or resisted by students and teachers? What does its use mean for them? Although grounded in a U.S. context, and specifically in classrooms in New York State, Translanguaging with Multilingual Students links findings and theories to different global contexts to offer important lessons for educators worldwide.

Biomedical engineering brings together bright minds from diverse disciplines, ranging from engineering, physics, and computer science to biology and medicine. This book contains the proceedings of the 11th Mediterranean Conference on Medical and Biological Engineering and Computing, MEDICON 2007, held in Ljubljana, Slovenia, June 2007. It features relevant, up-to-date research in the area.

David Crystal's classic *English as a Global Language* considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Health translation represents a critical yet underexplored research field in Translation Studies. High-quality health translation represents an integral part in the development of multicultural health resources. translation methods and models, holds the key to the success of multicultural health communication and promotion. Chapters in this book aim to fill in a persistent knowledge gap in current multicultural health research, that is, culturally effective and user-oriented healthcare translation. Research presented in this book points to an important opportunity to improve and enhance current multicultural healthcare services based on empirical, evidence-based health translation studies. Health translation provides a powerful intervention tool to engage with migrants with diverse language, cultural backgrounds and health literacy levels. This book provides much-needed reading in the emerging research field of healthcare translation. It makes useful and original contributions to this emerging research field through the exploration of culturally effective health translation methods, approaches and models, as well as the development and evaluation of digital health translation resources and tools.

This volume deals with different aspects of the creation and use of multilingual corpora. The term 'multilingual corpus' is understood in a comprehensive sense, meaning any systematic collection of empirical language data enabling linguists to carry out analyses of multilingual individuals, multilingual societies or multilingual communication. The individual contributions are thus concerned with a variety of spoken and written corpora ranging from learner and attrition corpora, language contact corpora and interpreting corpora to comparable and parallel corpora. The overarching aim of the volume is first to take stock of the variety of existing multilingual corpora, documenting possible corpus designs and uses, second to discuss methodological and technological challenges in the creation and analysis of multilingual corpora, and third to provide examples of linguistic analyses that were carried out on the basis of multilingual corpora.

At conferences and in the literature on community interpreting there is one burning issue that reappears constantly: the interpreter's role. What are the norms by which the facilitators of communication shape their role? Is there indeed only one role for the community interpreter or are there several? Is community interpreting aimed at facilitating communication, empowering individuals by giving them a voice or, in wider terms, at redressing the power balance in society? In this volume scholars and practitioners from different countries address these questions, offering a representative sample of ongoing research into community interpreting in the Western world, of interest to all who have a stake in this form of interpreting. The opening chapter establishes the wider contextual and theoretical framework for the debate. It is followed by a section dealing with codes and standards and then moves on to explore the interpreter's role in various different settings: courts and police, healthcare, schools, occupational settings and social services.

The Routledge Handbook of Translation and Culture collects into a single volume thirty-two state-of-the-art chapters written by international specialists, overviewing the ways in which translation studies has both informed, and been informed by, interdisciplinary approaches to culture. The book's five sections provide a wealth of resources, covering both core issues and topics in the first part. The second part considers the relationship between translation and cultural narratives, drawing on both historical and religious case studies. The third part covers translation and social contexts, including the issues of cultural resistance, indigenous cultures and cultural representation. The fourth part addresses translation and cultural creativity, citing both popular fiction and graphic novels as examples. The final part covers translation and culture in professional settings, including cultures of science, legal settings and intercultural businesses. This handbook offers a wealth

Literary Market Place 2005 is the ultimate insider's guide to the U.S. book publishing industry, covering every conceivable aspect of the business. Two easy-to-use volumes provide: 54 sections organizing everyone and everything in the business—from publishers, agents, and ad agencies to associations, distributors, and events. Over 14,000 listings in all—featuring names, addresses, and numbers; key personnel, activities, specialties, and other relevant data; e-mail addresses and Web sites; and more. Some 24,000 decision makers throughout the industry, listed in a separate "Personnel Yellow Pages" section in each volume. Thousands of services and suppliers equipped to meet every publishing need or requirement. LMP 2005 leaves no stone unturned in connecting you with the publishing firm, service, or product you or your patrons need. Completely revised and updated, LMP 2005 helps: publishers locate other publishers, freelancers, agents, printers, wholesalers, and manufacturers. suppliers find names and numbers of potential publishing customers. job seekers locate contact names, addresses, and phone numbers throughout the industry. writers locate publishers for their works. librarians provide patrons with the reference source they need to navigate the publishing industry. When it comes to books, you can reach the people who

The book presents a collection of carefully selected, peer-reviewed papers from the 21st International Multi-Conference on Advanced Computer Systems 2018 (ACS 2018), which was held in Międzyzdroje, Poland on September 24th-26th, 2018. The goal of the ACS 2018 was to bring artificial intelligence, software technologies, biometrics, IT security and distance learning researchers in contact with the ACS community, and to give ACS attendees the opportunity to exchange notes on the latest advances in these areas of interest. The primary focus of the book is on high-quality, original and unpublished research, case studies, and implementation experiences. All of the respective papers are of practical relevance to the construction, evaluation, application or operation of advanced systems. The topics addressed are divided into five major groups: artificial intelligence, software technologies, information technology security, multimedia systems, and information system design.
