### Regard for Reason in the Moral Mind

Since ancient times, hedonism has been one of the most attractive and controversial theories. In this text, the author presents a careful, modern formulation of hedonism, defending the theory against some of the most important objections.

### Religion, Philosophy and Psychical Research

### Unifying the Philosophy of Truth

This brief rhetoric introduces the essential reading and writing strategies students need to succeed in courses across the curriculum. Taking the transition from high school to college as his starting point, Hjortshoj speaks directly and honestly to students, offering them practical strategies to shed ineffective habits and move toward a more mature, flexible understanding of how to respond to academic challenges. Distilling information about writing assignments from across the curriculum, Hjortshoj shows students how to decode these assignments and approach them effectively. The second edition offers more advice on how to meet the difficult challenge of synthesizing and integrating sources, and the text has been streamlined to be a better reference.

### Pleasure and the Good Life

For more than three decades, Margaret Wilson's essays on early modern philosophy have influenced scholarly debate. Many are considered classics in the field and remain as important today as they were when they were first published.

Until now, however, they have never been available in book form and some have been particularly difficult to find. This collection not only provides access to nearly all of Wilson's most significant work, but also demonstrates the continuity of her thought over time. These essays show that Wilson possesses a keen intelligence, coupled with a fearlessness in tackling the work of early modern philosophers as well as the writing of modern commentators. Many of the pieces collected here respond to philosophical issues of continuing importance. The thirty-one essays gathered here deal with some of the best known early philosophers, including Descartes, Leibniz, Locke, Spinoza, and Berkeley. As this collection shows, Wilson is a demanding critic. She repeatedly asks whether the philosophers' arguments were adequate to the problems they were trying to solve and whether these arguments remain compelling today. She is not afraid to engage in complex argument but, at the same time, her own writing remains clear and fresh. Ideas and Mechanism is an essential collection of work by one of the leading scholars of our era. Originally published in 1999. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

### **The Philosophical Works of Descartes: Volume 2**

The burgeoning science of ethics has fostered pessimism about moral thought and action: we're told that they are driven by arbitrary factors and unreasoned feelings. Joshua May argues compellingly that this pessimism is not justified: moral judgment and motivation are fundamentally rational enterprises not beholden to the passions.

### **PHENOMENOLOGY**

What is Islamic Philosophy? offers a broad introduction to Islamic thought, from its origins to the many challenging issues facing Muslims in the contemporary world. The chapters explore early Islamic philosophy and trace its development through key themes and figures up to the twenty-first century. Topics covered include: ethical issues such as just war, abortion, women's rights, homosexuality and cloning questions in political philosophy regarding what kind of Islamic state could exist and how democratic can (or should) Islam really be the contribution of Islam to 'big questions' such as the existence of God, the concept of the soul, and what constitutes truth. This fresh and original book includes a helpful glossary and suggestions for further reading. It is ideal for students coming to the subject for the first time as well as anyone wanting to learn about the philosophical tradition and dilemmas that are part of the Islamic worldview.

### **Welcome to Philosophy!**

## **Essays on the Active Powers of the Human Mind**

### **The Future, a journal of philosophical research, ed. by L. Burke**

This book presents a history of spiritual exercises from Socrates to early Christianity, an account of their decline in modern philosophy, and a discussion of the different conceptions of philosophy that have accompanied the trajectory and fate of the theory and practice of spiritual exercises. Hadot's book demonstrates the extent to which philosophy has been, and still is, above all else a way of seeing and of being in the world.

### **The Research Paper**

### **The Vanity of Existence**

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

### **Doing Philosophy**

*Essays on Philosophy, Politics, & Economics* offers a critical examination of economic, philosophical, and political notions, with an eye towards working across all three, so that students and scholars from can expand their perspectives as they approach the necessarily complex research questions of today and tomorrow.

### **Research Guides to the Humanities, Social Sciences, Sciences,**

## **and Technology**

A collection of essays that focuses on teaching sport-related classes in the humanities and social sciences. It is designed to aid university faculty in proposing or revising courses and features sample syllabi, assignment instructions, and examinations in the appendix to each essay.

## **Philosophy manual: a South-South perspective**

This comprehensive anthology draws together classic and contemporary readings by leading philosophers on epistemology. Ideal for any philosophy student, it will prove essential reading for epistemology courses, and is designed to complement Robert Audi's textbook *Epistemology: A Contemporary Introduction* (Routledge, 1998). Themes covered include, perception, memory, inductive inference, reason and the a priori, the architecture of knowledge, skepticism, the analysis of knowledge, testimony. Each section begins with an introductory essay, guiding students into the topic. Includes articles by: Russell, Hume, Berkeley, Malcolm, Quine, Carnap, J.L. Austin, Pollock, Nozick, Putnam, G.E. Moore, Huemer, Reid, Plato, Bonjour, Coady, Carroll, Fumerton, Edwards, Foster, Howson, Urbach, Stove, Empiricus, Oakley, Alston, Gettier, Clark, Goldman, Lehrer, Paxson, DeRose, Dretske, Klein and Chisholm

## **The Story of Philosophy**

### **Mathematics in Philosophy**

Arthur Schopenhauer (1788-1860) is remembered as an atheist, a pessimist, and the first Western philosopher to incorporate Eastern thought into his work. Iconoclastic in his time, his ideas remain provocative and insightful today. The ten essays collected in this volume demonstrate his brilliance as both a scholar and a stylist. They serve as an ideal introduction to his work, as well as an illuminating supplement to his magnum opus, *The World as Will and Representation*.

### **What is Islamic Philosophy?**

During the early modern era (c. 1600-1800), philosophers formulated a number of new questions, methods of investigation, and theories regarding the nature of the mind. The result of their efforts has been described as "the original cognitive revolution". *Topics in Early Modern Philosophy of Mind* provides a comprehensive snapshot of this exciting period in the history of thinking about the mind, presenting studies of a wide array of philosophers and topics. Written by some of today's foremost authorities on early modern philosophy, the ten chapters address issues ranging from those that have long captivated philosophers and psychologists as well as those that have been underexplored. Likewise, the papers engage figures from the history of ideas who are well-known today (Descartes, Hume, Kant) as well as those who have been comparatively neglected by contemporary scholarship (Desgabets, Boyle, Collins). This volume will become an essential reference work that graduate students and professionals in the fields of

philosophy of mind, the history of philosophy, and the history of psychology will want to own.

### **Ideas and Mechanism**

### **Research Papers: Philosophy**

This book develops and defends a version of direct realism: the thesis that perception gives us direct awareness, and non-inferential knowledge, of the external world. Huemer rebuts the main arguments used by philosophical skeptics to try to show that we cannot know anything about the world outside of the mind, as well as the arguments used by representationalists to try to show that we only perceive representations of external objects.

### **Philosophical Writing**

### **Introduction To Mathematical Philosophy**

### **Skepticism and the Veil of Perception**

### **Phenomenology and Human Science Research Today**

Having enjoyed more than a decade of lively critique and creativity, feminist philosophy of religion continues to be a vital field of inquiry. *New Topics in Feminist Philosophy of Religion* maintains this vitality with both women and men, from their own distinctive social and material locations, contributing critically to the rich traditions in philosophy of religion. The twenty contributors open up new possibilities for spiritual practice, while contesting the gender-bias of traditional concepts in the field: the old models of human and divine will no longer 'simply do'! A lively current debate develops in re-imagining and revaluing transcendence in terms of body, space and self-other relations. This collection is an excellent source for courses in feminist philosophy, phenomenology, hermeneutics and literature, Continental and analytical philosophy of religion, engaging with a range of religions and philosophers including Kant, Kierkegaard, Marx, Heidegger, Arendt, Weil, Beauvoir, Merleau-Ponty, Ricoeur, Levinas, Irigaray, Bourdieu, Kristeva, Le Doeuff, bell hooks and Jantzen.

### **Epistemology: Contemporary Readings**

This important book by a major American philosopher brings together eleven essays treating problems in logic and the philosophy of mathematics. A common point of view, that mathematical thought is central to our thought in general, underlies the essays. In his introduction, Parsons articulates that point of view and relates it to past and recent discussions of the foundations of mathematics. *Mathematics in Philosophy* is divided into three parts. Ontology—the question of

the nature and extent of existence assumptions in mathematics—is the subject of Part One and recurs elsewhere. Part Two consists of essays on two important historical figures, Kant and Frege, and one contemporary, W. V. Quine. Part Three contains essays on the three interrelated notions of set, class, and truth.

## **We Have Never Been Modern**

Philosophical Writing: An Introduction, 4th Edition, features numerous updates and revisions to A. P. Martinich's best-selling text that instructs beginning philosophy students on how to craft a well-written philosophical essay. Features an entirely new chapter on how to read a philosophical essay, new sections on quantification and modality, and rhetoric in philosophical writing, as well as more updated essay examples Includes many new essay examples and an accompanying website with further topics and examples Traces the evolution of a good philosophical essay from draft stage to completion Emphasizes what a student should do in crafting an essay, rather than on what not to do Written with clarity and humor by a leading philosopher

## **A Treatise of Human Nature**

This brief text is designed to assist students with no previous formal background in writing philosophy papers. Contents includes topic selection, outlines and drafts, proper and improper quotation, argument development and evaluation, principles of good writing, style and logic.

## **Language, Thought and Consciousness**

First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

## **Crito**

## **Philosophical Topics**

The Philosophy Student Writer's Manual and Reader's Guide, Fourth Edition, is a set of instructions and exercises that sequentially develop citizenship, academic, and professional skills while providing students with knowledge about a wide range of philosophical concepts, phenomena, and information sources. Part 1 begins by teaching students to read newspapers and other media sources critically and analytically. It focuses on the crafts of writing and scholarship by providing the basics of grammar, style, formats, and source citation, and then introduces students to a variety of rich information resources. Part 2 provides advanced exercises in ethics, metaphysics, philosophy of the mind, philosophy of religion, and political philosophy.

## **The Unreality of Time**

## **New Topics in Feminist Philosophy of Religion**

Peter Carruthers argues that much of human conscious thinking is conducted in the medium of natural language sentences.

## **Philosophy as a Way of Life**

This anthology of the very latest research on truth features the work of recognized luminaries in the field, put together following a rigorous refereeing process. Along with an introduction outlining the central issues in the field, it provides a unique and unrivaled view of contemporary work on the nature of truth, with papers selected from key conferences in 2011 such as Truth Be Told (Amsterdam), Truth at Work (Paris), Paradoxes of Truth and Denotation (Barcelona) and Axiomatic Theories of Truth (Oxford). Studying the nature of the concept of 'truth' has always been a core role of philosophy, but recent years have been a boom time in the topic. With a wealth of recent conferences examining the subject from various angles, this collection of essays recognizes the pressing need for a volume that brings scholars up to date on the arguments. Offering academics and graduate students alike a much-needed repository of today's cutting-edge work in this vital topic of philosophy, the volume is required reading for anyone needing to keep abreast of developments, and is certain to act as a catalyst for further innovation and research.

## **Sport in the Classroom**

The aim of this edition is to present to English readers all the philosophical works of Descartes which were originally intended for publication. More than one valuable translation of the treatises which give a general view of Descartes' system has already appeared. But certain others which are quite indispensable for a thorough comprehension of his views have not yet been made accessible to English readers. The chief of these are probably the "Rules for the Direction of Understanding" and the "Passions of the Soul."

## **The Transition to College Writing**

## **The Philosophy Student Writer's Manual and Reader's Guide**

## **Management Culture and Corporate Social Responsibility**

This monograph focuses on the level of management culture development in organizations attempting to disclose it not only with the help of theoretical insights but also by the approach based on employees and managers. Why was the term "management culture" that is rarely found in literature selected for the analysis? We are quite often faced with problems of terminology. Especially, it often happens in the translation from one language to another. While preparing this monograph, the authors had a number of questions on how to decouple the management culture from organization's culture and from organizational culture, how to

separate management culture from managerial culture, etc. However, having analysed a variety of scientific research, it appeared that there is no need to break down the mentioned cultures because they still overlap. Therefore, it is impossible to completely separate the management culture from the formal or informal part of organizational culture. Management culture inevitably exists in every organization, only its level of development may vary.

### **Topics in Early Modern Philosophy of Mind**

#### **The Fixation of Belief**

Charles Sanders Peirce argued that the aim of inquiry is the fixation of belief, and that the scientific method is the most effective way of so doing.

#### **Essays on Philosophy, Politics & Economics**

Originally published in 1919, this work on the philosophy of mathematics is both expensive and hard to find in its first edition. It contains Bertrand Russell's ideas on number definition, cardinal numbers, propositional functions and much more. This is a fascinating work and thoroughly recommended for anyone interested in the philosophy of mathematics. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

#### **Conjectures and Refutations**

"The Unreality of Time" by John McTaggart Ellis McTaggart. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.
