Phoenix from the Ashes is a comprehensive look at the state of the Catholic Church since the Second Vatican Council--one of a series of recurrent periods of moral and intellectual crisis to which it has succumbed in its history. A chapter on the Council describes in detail how Pope Paul VI diverted it by placing it under the exclusive control of European liberals. An equally close study is devoted to the liturgical "reform" entrusted by the same pope to a group of radicals whose work undermined the spiritual and devotional legacy of the faithful. The loss of orthodox teaching and the disorientation following upon these changes produced a grave crisis in both clergy and laity, but the movement of return to tradition visible today promises a revival of the full Catholic life of the Church. Catholic readers now have a complete and eminently accessible account of the last 50 years of momentous changes in the Church, right up to the pontificates of Benedict XVI and Francis I. "This wide-ranging account of the self-destruction of the Roman Catholic Church and its identification of her only realistic route back to the land of the living simultaneously strikes a blow at history's two most prevalent temptations: rejection or twisting of evidence in the service of an ideological thesis, and honest dedication to intense research on subjects whose ultimate existential value the 'unbiased' historian somehow fears to reveal to his readers. Henry Sire courageously shuts no doors and stifles no evidence, employing a passionate and lively prose that leaves no doubt regarding his sense of the crucial moral and cultural importance of his topic."--JOHN RAO, author of Black Legends and the Light

of the World and Removing the Blindfold "For Catholics feeling lost at sea as a result of the turbulent crisis tossing and flooding the Barque of Peter, Henry Sire's work identifies clear landmarks to steady our gaze. He situates the present disarray within the larger historical context of the Arian heresy and Protestant revolution, and points to the buoys of tradition--liturgical, doctrinal, and philosophical--as sure guides to our way out. Sire distills entire epochs of history, from the first centuries of the Church through the current pontificate, into a highly readable and thought-provoking story. In the course of his tale he exposes the radical progressivism of the Second Vatican Council and its after-effects as well as the tepid conservatism of the Reform of the Reform and the Hermeneutic of Continuity."--BRIAN M. MCCALL, author of To Build the City of God "Historian H.J.A. Sire has compiled a balanced assessment of the revolution in the Roman Catholic Church. His mastery of the material is complete. The book flows along easily and readers will finish it confident that they have a comprehensive understanding of the last 60 years in the Church."--ROGER MCCAFFREY, President, Roman Catholic Books "Thanks to Henry Sire's penetrating book, we have some profound answers to nagging questions. How did the West end up so quickly in a post-Christian age, when only decades ago one could still speak of a Christian culture? How did we go from the seemingly healthy Roman Catholic Church of the 1950s to the mass apostasy and grave scandals of recent years? As Sire shows, the antecedents go back quite far, in fact many centuries, but the possibility of healing and regeneration is not as remote as we think."--STEPHEN KLIMCZUK-MASSION, Senior

Adviser, Hildebrand Project H.J.A. SIRE was born in 1949 in Barcelona of a family of French ancestry and was educated in England, at Stonyhurst College and at Exeter College, Oxford, where he took a degree in Modern History. He has written several books on subjects of Catholic history and biography and currently lives in Rome, where he works professionally as a historian.

Fundamentals of Aircraft and Rocket Propulsion

This book provides a comprehensive basics-to-advanced course in an aero-thermal

science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

Piaggio Vespa

From its origins the Italian battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion
