Canine Tracking Guide

In 1953, there were zero canine programs on any American police force. In 1989, there were more than 2,000 programs with over 7,000 police handler dog teams. In 1953, the Royal Canadian Mounted Police had the nation's only program with 20 teams but in 1989 there were 46 programs with 300 teams. These are dramatic program expansions. There have been controversial issues of using dogs; the pros and cons of using dogs for specialized functions are thoroughly analyzed in this book. Clearly identified are the elements to be assessed as a prelude to implementing a canine patrol unit, with the essential features critical to a unit's organization, operation, and ultimate success.

Tracking originated with man's need for food; he needed to understand what he was following and what the rewards would be if he was successful. Little has changed over time about the terms of tracking. We still track game for sport and food, but we have also found other uses for tracking. Border police patrol to stop illegal immigrants from entering their country; the military tracks down wanted terrorists or enemy forces. Tracking has become a military skill. In the SAS Tracking Handbook, former SAS soldier and British Empire Medal (BEM) award-winner Barry Davies teaches not only how to survive in the outdoors with the skills of tracking, but how to use these skills from a military standpoint. Included in this book are many helpful tips on topics including: The types of dogs used for tracking. Traps for catching wild animals. Modern military tracking. Using your surroundings to your advantage. And much more. The success or failure of the modern tracker is dependent on the personal skills of the individual tracker. Training is vital in learning tracking skills, and continuous exercise the best way to interpret signs. These skills are rarely found, but they remain hidden deep within all of us. So whether you're already a skilled tracker or a novice in the field, the SAS Tracking Handbook will be your guide to mastering this old and respected art.

K-9 Trailing

The "straightest path" is a simple honest approach to good trailing dog training. Schettler outlines his method for working trailing dogs, step by step, and with only one goal in mind: finding people. The simple truth of the matter is that trailing and tracking dogs do not find what they are looking for on most cases throughout this country. The problems all boil down to training for the dog, the handler, and the search managers. This program was designed for handling a trailing dog, and Jeff has been teaching now for over a decade. Whether you are training for search and rescue, are a K-9 cop, or a tactical team manager, Schettler's advice could save your life, the life of your dog, or that of another person one day.
