Beyond Databases, Architectures and Structures

"This book examines the political economy of violence in the Rio de Janeiro favela of Rocinha. Based on over two years of research and residence in the community, it offers an ethnographic account of how entangled forms of violence become essential forces shaping everyday social relations in the favela. The first part of the book shows how armed actors--drug traffickers and police--use spectacle to perform power. Yet despite the prevalence of physical violence, the favela has itself become a valuable global brand, consumed in disembodied fashion through media and in embodied fashion through tourism. Exploring media and favela tourism, the second part of the book demonstrates how the social relationships that arise from ongoing favela violence have a direct relationship to the market economy"--Provided by publisher.

Neutron Scattering in Biology

This book reports findings of a three-nation study of public relations and communication management sponsored by the International Association of Business Communicators (IABC) Research Foundation. The Excellence Study provides communication managers and public relations practitioners with information critical to their own professional growth, and supplies organizations with tools that help them communicate more effectively and build beneficial relations with key publics. Communication excellence is a powerful idea of sweeping scope that applies to all organizations -- large or small -- that need to communicate effectively with publics on whom the organization's survival and growth depend. The essential elements of excellent communication are the same for corporations, not-for-profit organizations, government agencies, and professional/trade associations. And they are applicable on a global basis. The study identifies three spheres of communication excellence. These spheres consider the overall function and role of communication in organizations, and define the organization of this book. They are: * the core or inner sphere of communication excellence -- the knowledge base of the communication department, * the shared expectations of top communicators and senior managers about the function and role of communication, and * the organization's culture -- the larger context that either nurtures or impedes communication excellence. This text also examines communication excellence as demonstrated in specific programs developed for specific publics.

Not Forgotten

While most critical studies of born-digital literature celebrate it as a postmodern art form with roots in contemporary technologies and social interactions, Digital Modernism provides an alternative genealogy. Grounding her argument in literary history, media studies, and the practice of close-reading, Jessica Pressman pairs modernist works by Ezra Pound, James Joyce, and Bob Brown, with major digital works like William Poundstone's Project for the Tachistoscope {Bottomless Pit}, Young-hae Chang Heavy Industries's Dakota, and Judd Morrissey's The Jew's Daughter to demonstrate how the modernist movement of the 1920s and 1930s laid the groundwork for the innovations of electronic literature. Accordingly, Digital Modernism makes the case for considering these digital creations as "literature" and argues for the value of reading them carefully, closely, and within literary history.

Using Research in Public Relations

In this enjoyable and informative book, authors Lofgren and Bhola challenge women to list the top three friends they'd call if their lives suddenly fell apart, thereby pointing out that many women may not have the friends they want when

they need them the most. Each author had her own profound experience that awakened her to the importance of female friends. Together they spent three years interviewing women about how they build and nurture their friendship circles, and exploring how and why friends contribute so richly to our lives. Their findings and stories will help women realize that friendships are as important to well-being as good health and sound finances—and should never be left to chance. In fact, according to studies: When women hang out with friends, their bodies release the hormone oxytocin, which combats stress and creates calm. Having friends reduces the risk of physical health issues and allows us to more easily recover after the death of a partner. And, women with friends are 26 percent less likely to develop dementia. Knowing the importance of friendship, however, may not always drive women to make or nurture friendships, even though doing so would ensure they have a safety net of women they can rely on when life is good or when all hell breaks loose. But who doesn't fear being alone or lonely when they move, divorce, change jobs, retire, face an empty nest, or suffer the loss of a partner or dear friend? That's why the authors encourage women to be intentional about nurturing a safety net of friends to fill unspeakable voids, provide certainty in uncertain times, and offer a safeguard of love and support. Packed with fun and inspiring stories and suggestions, the book covers everything from ways to keep virtual friendships alive to getting over and moving beyond friendship irritants and breakdowns. *Women I Want to Grow Old With* will guide and inspire women of all ages to breathe new life and excitement into our relationships by seeing female friends as “intention holders”—women who encircle us with love and support. These are women we love to laugh with and occasionally stir up trouble with! They serve as thought partners, voices of reason, and devil's advocates. They let us down and, once in a while, infuriate us. We forgive and so do they. These “women we keep on speed dial” literally and figuratively stand by our sides, cheering us on or helping us carry our burdens as we cross yet another finish line. And if we're lucky enough, no matter our age, we'll find women we want to grow old with!

A teacher presents a lesson, and at the end asks students if they understand the material. The students nod and say they get it. Later, the teacher is dismayed when many of the students fail a test on the material. Why aren't students getting it? And, just as important, why didn't the teacher recognize the problem? In *Checking for Understanding*, Douglas Fisher and Nancy Frey show how to increase students' understanding with the help of creative formative assessments. When used regularly, formative assessments enable every teacher to determine what students know and what they still need to learn. Fisher and Frey explore a variety of engaging activities that check for and increase understanding, including interactive writing, portfolios, multimedia presentations, audience response systems, and much more. This new 2nd edition of *Checking for Understanding* has

been updated to reflect the latest thinking in formative assessment and to show how the concepts apply in the context of Fisher and Frey's work on gradual release of responsibility, guided instruction, formative assessment systems, data analysis, and quality instruction. Douglas Fisher and Nancy Frey are the creators of the Framework for Intentional and Targeted (FIT) Teaching™. They are also the authors of numerous ASCD books, including The Formative Assessment Action Plan: Practical Steps to More Successful Teaching and Learning and the best-selling Enhancing RTI: How to Ensure Success with Effective Classroom Instruction and Intervention.

Women I Want to Grow Old With

This book is the final product of the "excellence project"--a comprehensive research effort commissioned by the International Association of Business Communicators (IABC) Research Foundation. Going well beyond any of the previously published reports on the Excellence study, this book contains many new statistical analyses of the survey data and more details from the case studies. Discussing theory and data related to several ongoing discussions in the communication profession, this book answers the following questions: *How can we show the value of public relations? *What is the value of relationships? *How do relationships affect reputation? *What does it mean to practice communication strategically? *How can we measure and evaluate the effects of public relations programs? *Should communication programs be integrated? *How does the new female majority in the profession affect communication Excellence? This book, as well as the research it reports, is the product of symmetrical communication and collaboration. As such, it is intended for scholars, applied researchers, students, and informed professionals who understand the value of research in developing a profession, such as public relations. Knowledge of quantitative and qualitative research methods will make it easier to understand the book; however, the results are interpreted in a way that makes the analyses understandable even to those

with little or no knowledge of statistics and research methods.

Those who survived the brutal dictatorship of the Somoza family have tended to portray the rise of the women's movement and feminist activism as part of the overall story of the anti-Somoza resistance. But this depiction of heroic struggle obscures a much more complicated history. As Victoria González-Rivera reveals in

this book, some Nicaraguan women expressed early interest in eliminating the tyranny of male domination, and this interest grew into full-fledged campaigns for female suffrage and access to education by the 1880s. By the 1920s a feminist movement had emerged among urban, middle-class women, and it lasted for two more decades until it was eclipsed in the 1950s by a nonfeminist movement of mainly Catholic, urban, middle-class and working-class women who supported the liberal, populist, patron-clientelistic regime of the Somozas in return for the right to vote and various economic, educational, and political opportunities.

Counterintuitively, it was actually the Somozas who encouraged women's participation in the public sphere (as long as they remained loyal Somocistas). Their opponents, the Sandinistas and Conservatives, often appealed to women through their maternal identity. What emerges from this fine-grained analysis is a picture of a much more complex political landscape than that portrayed by the simplifying myths of current Nicaraguan historiography, and we can now see why and how the Somoza dictatorship did not endure by dint of fear and compulsion alone.

Many believe Max Steiner's score for King Kong (1933) was the first important attempt at integrating background music into sound film, but a closer look at the industry's early sound era (1926–1934) reveals a more extended and fascinating story. Viewing more than two hundred films from the period, Michael Slowik launches the first comprehensive study of a long-neglected phase in Hollywood's initial development, recasting the history of film sound and its relationship to the “Golden Age” of film music (1935–1950). Slowik follows filmmakers' shifting combinations of sound and image, recapturing the volatility of this era and the variety of film music strategies that were tested, abandoned, and kept. He explores early film music experiments and accompaniment practices in opera, melodrama, musicals, radio, and silent films and discusses the impact of the advent of synchronized dialogue. He concludes with a reassessment of King Kong and its groundbreaking approach to film music, challenging the film's place and importance in the timeline of sound achievement.

As long as there have been vampires, there has been the Slayer. One girl in the all the world, to find them where they gather and to stop the spread of their evil and the swell of their numbers. Around Sunnydale, they say a scarecrow saturated with Halloween rain will come alive and slaughter anyone in sight. (Lovely place, Sunnydale.) Buffy's best friends, Xander and Willow, used to think the tale was nonsense -- but after a few adventures with Buffy, they're not so sure. Even without a maniacal scarecrow, a Sunnydale Halloween is a truly horrific happening. There are enough zombies and vampires about, ready to party hearty and eat some brains, to keep the Slayer and her friends up all night. And then rain starts to fall.
