Written at the request of the Enforcement and Special Projects Division of the World Intellectual Property Organization (WIPO) by Louis Harms, judge at the Supreme Court of Appeal of South Africa, this work aims at becoming a valuable tool for the handling of intellectual property cases in common law countries, particularly where precedent in this domain is rare.

Trademark and Unfair Competition Law

This book combines extracts from major cases and secondary materials with critical commentary to provide a complete resource for undergraduate and postgraduate students of intellectual property law. All areas of intellectual property law in the UK are covered: copyright, trademarks and passing off, confidential information, industrial designs, patent, procedure and enforcement. This book also tackles topical areas, such as the application of intellectual property law to new technologies and character merchandising. While the focus of the book is on intellectual property law in a domestic context, it provides international, EU and comparative law perspectives on major issues. It also addresses the wider policy implications of legislative and judicial developments in the area.

This book examines how intellectual property rights (IPR) affect the daily lives of individuals worldwide and how that may in turn impact the health and wealth of nations. While the protection of the intellectual endeavours of authors and inventors is vital for a fair and just society it is important that the IPR regime remains flexible enough to encourage creativity, innovation and the free flow of information and technology that are critical to the well being of billions of people, especially in the developing world. This work examines the implications of the IPR regime for basic human security. It examines the relationship between IPR regime and fundamental human rights, such as the right to education, health and food, and the broader right to development. This book will be of interest to IP scholars, international relations specialists and international security analysts, in particular those interested in non-traditional security issues. It may also serve as resource book for the international business community on developmental and human rights aspects of IP.

Innovation, Competition and Consumer Welfare in Intellectual Property Law is truly enriching reading. Hanns Ullrich, College of Europe, Bruges, Belgium We in the United States have much to learn not only from Gustavo Ghidini s careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law. Rudolph J.R. Peritz, New York Law School, US and author of Competition Policy in America This authoritative book provides a comprehensive critical overview of the basic IP paradigms, such as patents, trademarks and copyrights. Their intersection with competition law and their impacts on the exercise of social welfare are analysed from an evolutionary perspective. The analyses and proposals presented encompass the features and rationales of a legal field in constant evolution, and relate them to increasingly rapid technological, economic, social and geo-political developments. Gustavo Ghidini highlights the emerging trends that challenge the traditional all-exclusionary vision of IP law and its application. The author expertly combines holistic, evolutionary and constitutionally oriented approaches, with the search for a rebalancing of the IP rights holders positions with citizens and users rights. This book will appeal to academics, scholars and lawyers specializing in the realm of intellectual property, competition and comparative law.

Intellectual Property and Competition Law

In a sophisticated defense of intellectual property, Merges draws on Kant, Locke, and Rawls to explain how IP rights are based on a solid ethical foundation and make sense for a just society. He also calls for appropriate boundaries: IP rights are real, but they come with real limits.

Selected Intellectual Property and Unfair Competition Statutes,

Regulations, and Treaties 2019

This is a book dedicated to the significance and legacy of landmark cases in the field of intellectual property. Eleven well-known scholars offer in-depth commentary and analysis of cases that have made an impact on legal theory or critical thinking about the scope and purpose of the protection of intellectual and industrial creativity. All the cases covered have proven useful in developing doctrine, even though subsequent developments have made some appear and misleading and rather than and leading and, and for some recent cases it is too early to say whether their approach will become mainstream. Among the fundamental questions and all profoundly interesting, and to which no definite answers have yet been found and arising in the course of the analysis are the following: and Who should be master over the reputation, esteem and legacy of authors and their works and authors and their heirs, or subsequent copyright owners? and What, if any, protection should be granted to achievements in the absence of confusion? and Should prevention of unfair competition allow one to and reap what one has not sown and? and Should we protect commercial investment beyond the scope of defined intellectual property rights? and Should it be considered a tort to use a well-known mark in a way that may dilute its repute and distinctive character? and What kinds of monopolies should be protected, if any? and Does the patent system in its current form allow us to question the assumption that technological progress is good per se, and that novel and

inventive solutions should thus be protected? and□ Should extraneous considerations such as public good and social usefulness be considered at the stages of grant and enforcement of patent rights? and□ Should we grant patents over living organisms whose workings and reproduction are a long way from being completely understood? and□ Should the rules developed for the enforcement of property rights limit a patenteeand□s remedies to appropriate damages, thereby effectively granting a compulsory licence? The book concludes with an analysis of two case clusters remarkable for the worldwide dimension of the dispute. The authors show how litigation over Lego in about 30 jurisdictions and Budweiser in over 40 jurisdictions has enriched doctrine on such issues as contract, trade marks, trade names, geographical indications, property rights in general, human rights, and various international and bilateral treaties, all as they impinge on the protection of intellectual property rights. For scholars in the field, as well as for lawyers seeking a rich vein of doctrine to buttress a case, this unusual book will be of incomparable value. As a masterful clarification of salient doctrine, it represents a major contribution to the legal theory underpinning intellectual property law.

The book ends with a comprehensive selection of the relevant bibliography. This part is all the more valuable to the reader as Ghidini does not simply list the relevant literature but puts it in its general context and comments on it. Ghidini's book is a fascinating trip through the system of IP laws. Beatriz Conde Gallego, Intellectual Property and Competition Law Intellectual Property and Competition Law by Gustavo Ghidini provides a persuasively presented descriptive analysis of a distinctively European perspective on intellectual property law and its relationship to competition law. Professor Ghidini expertly presents the evolution of intellectual property laws and its contemporary manifestations with respect to the expansion of copyright law in technological fields and the inevitable conflict with patent law, the attempt at creating monopolies (such as in biotechnology), and so much more. A seminal work of impressive and articulate scholarship, Intellectual Property and Competition Law should be considered mandatory reading for students and

researchers in the field of intellectual property rights and a very strongly recommended addition to academic library International Economics and Judicial Studies reference collections. The Economics Shelf, Midwest Book Review . . . the provocative nature of this book is one of its great strengths, as are its cohesiveness and erudition. Mel Marquis, European Competition Law Review We in the United States have much to learn not only from Gustavo Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law. Rudolph J.R. Peritz, New York Law School, author of Competition Policy in America and American Antitrust Institute, US This rich and challenging book offers a critical appraisal of the relationship between intellectual property law and competition law, from a particularly European perspective. Gustavo Ghidini highlights the deficiencies in studying each of these areas of law independently and argues for a more holistic approach, insisting that it is more useful, and indeed essential, to consider them as interdependent. He does this first by examining how competition and intellectual property (IP) converge, diverge, and inform one another. Secondly, he assesses how IP law can be interpreted through the guiding principles of competition law antitrust and unfair competition and within the overarching principle of free competition. The book traces the evolution of modern IP law, which it claims is marked heavily both by over-protectionist trends such as the extension of copyright law to technological fields, where it trespasses on the

territory of patent law and by attempts to monopolize the achievements of basic research, such as in the example of biotechnology. Through an examination of such emerging issues as access to standards of information and patenting of genetic materials, the author makes a clear case for a reading of IP law that promotes dynamic processes of innovation by competition , and competition by innovation , with related benefits to consumer welfare such as wider choices, greater access to culture and information, and lower prices. Advanced students and researchers in all areas of intellectual property will find this book a stimulating alternative to traditional interpretations of the subject.

several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley

In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals,
