The Jungle portrays the harsh conditions and exploited lives of immigrants in the United States in Chicago and similar industrialized cities. The book depicts working-class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. The primary purpose of the novel in describing the meat industry and its working conditions was to advance socialism in the United States. The main character in the book, Jurgis Rudkus, a Lithuanian immigrant, tries to make ends meet in Chicago. The book begins with his wife Ona and his wedding feast. He and his family live near the stockyards and meatpacking district where many immigrants, who do not know much English, work. He takes a job at Brown's slaughterhouse. Jurgis had thought the US would

offer more freedom, but he finds working-conditions harsh. He and his young wife struggle to survive as they fall deeply into debt and become prey to con men. Hoping to buy a house, they exhaust their savings on the down payment for a substandard slum house, which they cannot afford. The family is eventually evicted after their money is taken.

For anyone approaching Discourse Analysis for the first time, theory means little when it is not related to actual knowledge and experience of language in use. Describing Discourse takes the unique approach of introducing discourse studies through the hands-on analysis of linguistic data. The book introduces students to specific discourses constructed for particular purposes, for example, from the domains of advertising, law, medicine and education. Each chapter provides examples, exercises and commentary designed to develop the analytical abilities needed in describing the characteristic forms and typical functions of different discourses. Describing Discourse provides the ideal entry into the study of discourse for students new to the subject.

Measuring America

This book traces how and why the secession of the South during the American Civil War was accomplished at ground level through the actions of ordinary men. Adopting a micro-historical approach, Lawrence T. McDonnell works to connect small events in new ways - he places one company of the secessionist Minutemen in historical context, exploring the political and cultural dynamics of their choices. Every chapter presents little-known characters whose lives and decisions were crucial to the history of Southern disunion. McDonnell asks readers to consider the past with fresh eyes, analyzing the structure and dynamics of social networks and social movements. He presents the dissolution of the Union through new events, actors, issues, and ideas, illuminating the social contradictions that cast the South's most conservative city as the radical heart of Dixie.

Women's Experimental Cinema

From his cult classic television series *Twin Peaks* to his most recent film *Inland Empire* (2006), David Lynch is best known for his unorthodox narrative style. An award-winning director, producer, and writer, Lynch distorts and disrupts traditional storylines and offers viewers a surreal, often nightmarish perspective. His unique approach to filmmaking has made his work familiar to critics and audiences worldwide, and he earned Academy Award nominations for Best Director for *The Elephant Man* (1980), *Blue Velvet* (1986), and *Mulholland Drive* (2001). Lynch creates a new reality for both characters and audience by focusing on the

individual and embracing existentialism. In *The Philosophy of David Lynch*, editors William J. Devlin and Shai Biderman have compiled an impressive list of contributors to explore the philosophy at the core of the filmmaker's work. Lynch is examined as a postmodern artist, and the themes of darkness, logic, and time are discussed in depth. Other prominent issues in Lynch's films, such as *Bad faith* and freedom, ethics, politics, and religion, are also considered. Investigating myriad aspects of Lynch's influential and innovative work, *The Philosophy of David Lynch* provides a fascinating look at the philosophical underpinnings of the famous cult director.

Performing Disunion

" Everyone has an animal story--the pet they loved or hated, the wild animal that captured their childhood imagination, the nasty dog at the end of the street, the deer your uncle shot or your neighbor hit while driving. Telling stories about animals is part of how we tell the story of being human, but recent scientific breakthroughs in animal cognition, the exploding interdisciplinary field of animal studies, and global climate change have all complicated these stories. *Animal Acts* collects some of the most exciting, provocative, and moving solo performances on animals, grounded by commentaries that help put these engaging works in a larger context. *Animal Acts* includes the work of leading theater artists Holly Hughes, Rachel Rosenthal, Deke Weaver, Carmelita Tropicana, and others, along with

commentary by major scholars including Donna Haraway, Jane Desmond, Jill Dolan, and Nigel Rothfels. A masterful introduction by Una Chaudhuri provides readers a useful foundation for understanding and appreciating the intersection of animal studies and performance. The anthology makes an important contribution to several fields as it foregrounds questions of race, gender, sexuality, class, nation, and other issues central to the human project within the discourse of the "post human." The collection will be of interest to those interested in solo performance, animal studies, gender studies, performance studies, and environmental studies"--

Rise Up

From Betty Crocker to Feminist Food Studies

Literary Copyright Reform in Early Victorian England

This volume considers the rise of a new mode of creating, spreading, and encountering moral claims and ideas as they are expressed within spectacles. Brian M. Lowe explains how spectacles emerge when we are saturated with mediated representations—including pictures, texts, and videos—and exposed to television and movies and the myriad stories they tell us. The question of which moral issues gain our attention and which are neglected increasingly relates to how societal concerns are supported—or obscured—by spectacles. This project explores how this new form of moral understanding came to be. Through a series of case studies, including the use of radio and comic books; the crafting of Russian national identity through art; television and film; the evolution of human rights law through film and journalism; and the promotion of animal rights campaigns, this book unveils some of the ways in which our spectacular environment shapes moral understanding, and is in turn shaped by spectacle.

Punk in Russia

Punk culture is currently having a revival worldwide and is poised to extend and mutate even more as youth unemployment and youth alienation increase in many countries of the world. In Russia, its power to have an impact and to shock is well illustrated by the state response to activist collective and punk band Pussy Riot. This book, based on extensive original research, examines the nature of punk culture in contemporary Russia. Drawing on interviews and observation, it explores the vibrant punk music scenes and the social relations underpinning them in three contrasting Russian cities. It relates punk to wider contemporary culture and uses the Russian example to discuss more generally what constitutes 'punk' today.

"Tiger-Lilies is actually a somewhat autobiographical book. In it, Lanier analyzes the relationship between a Northerner and a Southerner throughout the Civil War. As a Southerner who had fought for the Confederate army, Lanier had experienced the war firsthand, both on the battlefield and as a prisoner of war. These experiences are recognizable in the battle scenes especially, which are considered some of the most realistic representations of Civil War combat in literature. Ultimately, Tiger-Lilies can be interpreted as an anti-war novel and one of Lanier's less successful endeavors in the course of his career."--The History Engine.

This book provides an intimate history of Nobel Laureate Vernon Smith's early life, combining elements of biography, history, economics and philosophy to show how crucial incidents early in his life provided the necessary framework for his research

into experimental economics. Smith takes the reader from his family roots on the railroads and oil fields of Middle America to his early life on a farm in Depression-wracked Kansas. A mediocre student in high school, Smith attended Friends University, on Wichita's west side, where an intense study of mathematics, physics, chemistry, and astronomy enabled him to pass the examinations to enter Caltech and study under luminary scientists like Linus Pauling. Eventually Smith discovered economics and pursued graduate study in the field at University of Kansas and Harvard. This volume ends with his Camelot years at Purdue, where he began his famous work in experimental economics, nurturing his research into an unlikely new field of economics.

boardwalk strongman, Foreign Legionnaire, politician, and archeologist. The Jungle

“The novel that foreshadowed Donald Trump’s authoritarian appeal.”—Salon It Can’t Happen Here is the only one of Sinclair Lewis’s later novels to match the power of *Main Street*, *Babbitt*, and *Arrowsmith*. A cautionary tale about the fragility of democracy, it is an alarming, eerily timeless look at how fascism could take hold in America. Written during the Great Depression, when the country was largely oblivious to Hitler’s aggression, it juxtaposes sharp political satire with the chillingly realistic rise of a president who becomes a dictator to save the nation from welfare cheats, sex, crime, and a liberal press. Called “a message to thinking Americans” by the *Springfield Republican* when it was published in 1935, *It Can’t Happen Here* is a shockingly prescient novel that remains as fresh and contemporary as today’s news. Includes an Introduction by Michael Meyer and an Afterword by Gary Scharnhorst

Dog Breaking

In much the same way in which he characterized planets and asteroids as

powerful, gendered beings in Inside Planets, Ellias Lonsdale gives new depth and nuance to degree analysis, an area often seen as technical or reduced to cliché. The degree symbols are most useful in elaborating a personal birth chart. One can learn about personal cycles from studying the place of a transiting or progressed planet by degree at a given time, revealing collective as well as personal timings. The Zodiac degrees also act as an oracle. One can open the collection anywhere for a given day, or in response to a question. The degrees will reveal what is happening now and, if we are attentive and responsive to the cues, what is required of us. By comparing charts of friends and famous people who are known for certain qualities, one can gradually discriminate among the degrees. These beautifully written and fully imagined readings of the Chandra degree symbols speak to a deep level of personal change and authenticity.

China from the Inside

A review of the original edition of The Burdens of Disease that appeared in ISIS stated, "Hays has written a remarkable book. He too has a message: That epidemics are primarily dependent on poverty and that the West has consistently refused to accept this." This revised edition confirms the book's timely value and provides a sweeping approach to the history of disease. In this updated volume, with revisions and additions to the original content, including the evolution of drug-resistant diseases and expanded coverage of HIV/AIDS, along with recent data on

mortality figures and other relevant statistics, J. N. Hays chronicles perceptions and responses to plague and pestilence over two thousand years of western history. Disease is framed as a multidimensional construct, situated at the intersection of history, politics, culture, and medicine, and rooted in mentalities and social relations as much as in biological conditions of pathology. This revised edition of *The Burdens of Disease* also studies the victims of epidemics, paying close attention to the relationships among poverty, power, and disease.
