Elements of Fracture Mechanics

Focuses on organisational goals and those of other stakeholders and society at large. This book provides an insight into the potential benefits and pitfalls, expectations and concerns of advancing a critical view of HRD in practice. It is intended for lecturers, students and practitioners who are aching for a critical analysis.

OPTICAL COMMUNICATION SYSTEMS

This book is an in-depth examination of the much needed process of “self” study known as self observation. We live in an age where the “attention function” in the brain has been badly damaged by TV and computers-up to 90 percent of the public under age 35 suffers from attention-deficit disorder! This book offers the most direct, non-pharmaceutical means of healing attention dysfunction. The methods presented here are capable of restoring attention to a fully functional and powerful tool for success in life and relationships. This is also an age when humanity has lost its connection with conscience. When humanity has poisoned the Earth’s atmosphere, water, air and soil, when cancer is in epidemic proportions and is mainly an environmental illness, the author asks: What is the root cause? And he boldly answers: Failure to develop conscience! Selfobservation, he asserts, is the most ancient, scientific, and proven means to develop this crucial inner guide to awakening and a moral life. This book is for the lay-reader, both the beginner and

the advanced student of self observation. No other book on the market examines this practice in such detail. There are hundreds of books on self-help and meditation, but almost none on self-study via self-observation, and none with the depth of analysis, wealth of explication, and richness of experience which this book offers. Red Hawk, author of 5 collections of poetry, was the Hodder Fellow at Princeton University (1992-93) and is currently a full professor at the University of Arkansas, Monticello. He has practiced self-observation for over 30 years, under the guidance of the Gurdjieff Society of Arkansas, meditation master Osho Rajneesh, and spiritual teacher, Lee Lozowick.

Becoming a grandma is like getting a subpoena. You don't expect it. You don't know how to respond. You know you must be mature and accept it. Being a grandma, though, is as close as many of us ever get to perfection. Filled with snappy one-liners followed by humorous anecdotes, this is the perfect gift book to keep grandma laughing. As author Bryna Nelson Paston says, "We have a window of opportunity as grandparents, usually five years, or maybe more if you're lucky. So you have to make your move fast and decisively. Your kids and their spouses will intrude, interrupt, and interfere. But persevere. Circumvent them, do exactly what you want, and lie— with dignity, I might add. Whatever it takes. Promise anything, but get the kid."

The Kama Sutra in 200 positions

The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. Real Sex will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. Real Sex is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and

sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. Real Sex offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

Henry Miller's monumental venture in self-revelation was begun with his Tropic of Cancer and Tropic of Capricorn, which on their American publication were hailed as "miraculous," "superb," "ribald," "brilliant," and "shamelessly shocking." Sexus is the first volume of a series called The Rosy Crucifixion, in which Miller completes his major life work. It was written in the United States during World War II, and first published in Paris in 1949. Of this remarkable project, Lawrence Durrell has said: "The completion of his seven-volume autobiography, if it fulfills the promise of

what he has already given us, will put his name amongst the three or four great figures of the age."

Given the enormous destructive capacity of precision weapons in the modern era and the inherent vulnerabilities of modern society to high technology attack, this book is more relevant today than when it was first written in the midst of the nuclear age, in 1953. Remaining one of the finest texts ever written on the history of warfare and weapons acquisition, this is a thorough and reliable work that should be a standard reference for acquisition managers and decision-makers, providing a guide to informed decision-making that reflects the experience and

"The idea of this seminar is to look at the different heads of the capitalist system to try to understand whether it has new ways of attacking us or whether they are the same ones as before. If we are interested in other ways of thinking, it is in order to see if we are right about what we think is coming--that there will be a tremendous economic crisis that will be added to existing evils and do tremendous damage to everyone everywhere, all over the world. So if it's true that this is coming, or that it's already happening, we need to think about whether it will work to keep doing the same things that have been done before." --Subcomandante Insurgente Moisés "If there are those who think that everything is the same and that things can change through elections, marches, tweets, signatures on change.org or whatever the hell you call it--well no, things aren't going to change like that. We have to find new ways. For what? Well that 'for what' is what we have to answer

and we must once again draw the face of the [capitalist] Hydra, because it has changed." --Subcomandante Insurgente Galeano

Annie John is a haunting and provocative story of a young girl growing up on the island of Antigua. A classic coming-of-age story in the tradition of *The Catcher in the Rye* and *A Portrait of the Artist as a Young Man*, Kincaid's novel focuses on a universal, tragic, and often comic theme: the loss of childhood. Annie's voice—urgent, demanding to be heard—is one that will not soon be forgotten by readers. An adored only child, Annie has until recently lived an idyllic life. She is inseparable from her beautiful mother, a powerful presence, who is the very center of the little girl's existence. Loved and cherished, Annie grows and thrives within her mother's benign shadow. Looking back on her childhood, she reflects, "It was in such a paradise that I lived." When she turns twelve, however, Annie's life changes, in ways that are often mysterious to her. She begins to question the cultural assumptions of her island world; at school she instinctively rebels against authority; and most frighteningly, her mother, seeing Annie as a "young lady," ceases to be the source of unconditional adoration and takes on the new and unfamiliar guise of adversary. At the end of her school years, Annie decides to leave Antigua and her family, but not without a measure of sorrow, especially for the mother she once knew and never ceases to mourn. "For I could not be sure," she reflects, "whether for the rest of my life I would be able to tell when it was really my mother and when it was really her shadow standing between me and the rest of the world."

The Lorian Legend

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of

New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

THE LEGEND AND MYSTERY OF RIGEL On a frigid night in 1912 the great unsinkable Titanic sank 2 miles down to a watery grave. Many stories of heroes and villains have been passed down since that fateful night. Yet there is one hero in particular whose story has remained a mystery. Meet Rigel- the Titanic's Newfoundland dog mascot. His incredible story of courage and survival was originally published as an alleged factual account in 1912 just days after the sinking. Come along and enjoy this fictionalized story of Rigel's tragedy and triumph in spite of challenges no human could have survived! * * * Yes Virginia, there may have been a Rigel. The story of Rigel was first reported in the "New York Herald" the day the Carpathia docked with Titanic's survivors. It also appeared in a well-known book: " The Sinking of Titanic and Great Sea Disasters" which was first published in 1912 a few short months after the disaster. After that there was no mention of him at all, no disclaimers, no retractions, nothing to my knowledge. Although there has been some recent mention of him in dog books all subsequent books and movies about Titanic by historians, crew and survivors don't mention him either. Why? Was he a figment of the reporter's imagination? That seems unlikely. If Rigel and new owner didn't exist then who was interviewed? Someone playing a cruel joke while wearing a uniform and holding onto a 150-pound dog? Unlikely again, but I suppose that could have happened. The only two well-known dogs that survived the sinking were toy breeds lovingly smuggled on board the lifeboats in their owner's coats. All of the other dogs on board lost their lives including a champion English Bulldog who was last seen trying to swim in the frigid

water. Comparing a bulldog's swimming ability to a Newfoundland's is like expecting your Shetland Pony to win the Kentucky Derby. Bulldogs are among the worst swimmers in dog-dom and Newfoundlands are the absolute best. Many people are skeptical as to whether any creature could have survived a long distance swim in freezing water. Certainly none of the people did. "Newfie" owners and breeders have no problem believing a Newfoundland could do exactly what the record states. Bred to withstand the harsh conditions of the frigid north Atlantic they have been used to haul in heavy fishing nets and assist in water rescues. Newfoundlands could be called the "Polar bears" of the dog world. They have the same adaptations for swimming albeit on a smaller scale. And since Scientists have seen Polar Bears swimming 100 miles out to sea in freezing water and not looking the least bit exhausted, then why not? The near lifeboat collision was also never mentioned again. Perhaps it was dropped purposely. No one wanted to detract from the heroics of the Carpathia and crew. After pushing their small steamer full speed into the very same icefield that doomed Titanic, they deserved all the credit and praise that was bestowed on them. Finally there is the Jonas Briggs mystery. He isn't listed on either ship's crew list for that year. For many that is proof positive this was nothing more than a hoax. Apparently these people have never done genealogy research. Our ancestors were not sticklers for detail. Sometimes they'd spell names phonetically. Other times they'd scribble a name and then not be able to decipher it. I found one of my ancestor's names spelled 4 different ways. One spelling was way off. I changed Jonas to John in my book, a common name that

could have been mistaken for Jonas. Taking into account the pandemonium surrounding the Carpathia's arrival there would certainly be some examples of miscommunication.
