National Audubon Society Field Guide to North American Birds

Photographs, diagrams, physical descriptions, and
details about habitat, season, and other
characteristics facilitate the identification of eastern
North America's wildflowers.

National Audubon Society Field Guide to Tropical Marine Fishes

Identifies the region's plant and animal life, offers an
overview of natural history, and describes the area's
beaches, parks, preserves, and forests

The Audubon Society Field Guide to North American Rocks and Minerals

Presents a handbook for the identification of over five hundred species of trees by illustration and text.

National Audubon Society Field Guide to Fishes

Each of the 690 identification pictures is a full-color photograph of a seashore creature. Arrangement by shape and by color makes identification quick and easy. 666 species are covered in full detail.

Identifying Trees of the East

National Audubon Society Field Guide to the Mid-Atlantic States

Perfect for the anti-aviary (or bird fanatic with a sense of humor), this snarky illustrated handbook is equal parts profane, funny, and—let's face it—true. Featuring 50 common North American birds, such as the White-Breasted Butt Nugget and the Goddamned Canada Goose (or White-Breasted Nuthatch and Canada Goose for the layperson), Kracht identifies all the idiots in your backyard and details exactly why they suck with humorous, yet angry, ink drawings. Each entry is accompanied by facts about a bird's (annoying) call, its (dumb) migratory pattern, its (downright tacky) markings, and more. With

Acces PDF The Audubon Society Field Guide To The Natural Places Of The Mid Atlantic States Coastal

migratory maps and tips for birding, plus musings on the avian population and the ethics of birdwatching, this is the essential guide to all things wings. No need to wonder what all that racket is anymore!

The Audubon Society Field Guide to North American Mushrooms

A simple and enjoyable book to aid in the identification of eastern species of birds.

National Audubon Society Field Guide to California

Describes hundreds of minerals and lists their geographic distribution, physical properties, chemical composition, and crystalline structure

The Audubon Society Field Guide to North American Insects and Spiders

Facilitates the identification of eastern North America's wildflowers

Aids in identifying eight hundred species of common North American fossils with color photographs and line drawings

The Audubon Society Field Guide to North American Birds, Eastern Region

'I can't remember the last book I read that I could say with absolute assurance would save lives. But this one will' Chris Packham 'Fabulously direct and truthful, filled with energy but devoid of self-pity . . . I was impressed and enchanted. Highly recommended' Stephen Fry 'Succeeds - triumphantly - in articulating with great honesty what it is like to suffer with a mental illness, and in providing strategies for coping' Mail on Sunday When Joe Harkness suffered a breakdown in 2013, he tried all the things his doctor recommended: medication helped, counselling was enlightening, and mindfulness grounded him. But nothing came close to nature, particularly birds. How had he never noticed such beauty before? Soon, every avian encounter took him one step closer to accepting who he is. The positive change in Joe's wellbeing was so profound that he started a blog to record his experience. Three years later he has become a spokesperson for the benefits of birdwatching, spreading the word everywhere from Radio 4 to Downing Street. In this groundbreaking book filled with practical advice, Joe explains the impact that birdwatching had on his life, and invites the reader to discover these extraordinary effects for themselves.
