### The Ultimate Harry Potter and Philosophy

#### Before and After Gender

Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command. Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch "ideas not missiles" into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

#### Hybridity, OR the Cultural Logic of Globalization

This book provides an introduction to the author's life, as well as a guided overview of his body of work. Designed for the fan and scholar alike,

this text features an alphabetized, fully-annotated listing of major terms in the Carey canon, including fictional characters, motifs, historical events, and themes. Additional features include a listing of headwords, a Carey history, 44 reading and writing topics, and bibliographies of primary and secondary sources. A comprehensive index is included.

## The Existential Adulteration of Harry Potter

The Great Acceleration is an energizing account from a brilliant new writer of how our society is speeding up--and why we should embrace it. In this revelatory study of modern living, Robert Colvile inspects the various ways in which the pace of life in our society is increasing and examines the evolutionary science behind our rapidly accelerating need for change, as well as why it's unlikely we'll be able to slow down . . . or even want to. Exploring theories surrounding the effect of this

speed on our minds and bodies, Colvile reveals how, contrary to gloomier predictions, living in a faster age might be beneficial for us, both physically and mentally. In addition to the universe of social media, he examines the opportunities that faster communication and operation could bring to everything from music, film, and books to transportation, politics, and government. Comparing developments in cities and villages, advanced economies and underdeveloped countries, East and West, The Great Acceleration explains how the positives outnumber the negatives and, if this acceleration is truly inevitable, why we should rush to embrace it.

### **Harry Potter and the Art of Spying**

Written in the early 1970s amidst widespread debate over the causes of gender inequality, Strathern's book was intended as an analysis of gender as a powerful cultural code and sex as a defining mythology. But the manuscript went into storage, where it remained for more than four decades. This book finally brings it to light, giving the long-lost feminist work, accompanied here by an afterword from Judith Butler. Strathern engages some of the leading feminist thinkers of the time, including Shulamith Firestone, Simone de Beauvoir, Ann Oakley, and Kate Millett. Building toward a conclusion in which she argues that we underestimate the materializing grammars of sex and gender at our own peril, she offers a powerful challenge to the intransigent mythologies of sex that still plague contemporary society.

### **Sabotage Art**

This book provides an introduction to the study of meaning in human language, from a linguistic perspective. It covers a fairly broad range of topics, including lexical semantics, compositional semantics, and pragmatics. The chapters are organized into six units: (1) Foundational concepts; (2) Word meanings; (3) Implicature (including indirect speech acts); (4) Compositional semantics; (5) Modals, conditionals, and causation; (6) Tense & aspect. Most of the chapters include exercises which can be used for class discussion and/or homework assignments, and each chapter contains references for additional reading on the topics covered. As the title indicates, this book is truly an INTRODUCTION: it provides a solid foundation which will prepare students to take more advanced and specialized courses in semantics and/or pragmatics. It is also intended as a reference for fieldworkers doing primary research on under-documented languages, to help them write grammatical descriptions that deal carefully and clearly with semantic issues. The approach adopted here is largely descriptive and non-formal (or, in some places, semi-formal), although some basic logical notation is introduced. The book is written at level which should be appropriate for advanced undergraduate or beginning graduate students. It presupposes some previous coursework in linguistics, but does not presuppose any background in formal logic or set theory.

## **Culinary Linguistics**

This open access book examines more than two centuries of societal development using novel historical and statistical approaches. It applies the well-being monitor developed by Statistics Netherlands that has been endorsed by a significant part of the international, statistical community. It features The Netherlands as a case study, which is an especially interesting example; although it was one of the world's richest countries around 1850, extreme poverty and inequality were significant problems of well-being at the time. Monitors of 1850, 1910, 1970 and 2015 depict the changes in three dimensions of well-being: the quality of life 'here and now', 'later' and 'elsewhere'. The analysis of two centuries shows the solutions to the extreme poverty problem and the appearance of new sustainability problems, especially in domestic and foreign ecological systems. The study also reveals the importance of natural capital: soil, air, water and subsoil resources, showing their relation with the social structure of the 'here and now'. Treatment and trade of natural resources also impacted on the quality of life 'later' and 'elsewhere.' Further, the book illustrates the role of natural capital by dividing the capital into three types of raw materials and concomitant material flows: bio-raw materials, mineral and fossil subsoil resources. Additionally, the analysis of the institutional context identifies the key roles of social groups in well-being development. The book ends with an assessment of the solutions and barriers offered by the historical anchoring of the well-being and sustainability issues. This unique analysis of well-being and sustainability and its institutional analysis appeals to historians, statisticians and policy makers.

## **Edward Albee and Absurdism**

This book is a critical biography of Grant Allen, (1848-1899), the first for a century, based on all the surviving primary

sources. Born in Kingston, Ontario, into a cultured and affluent family, Allen was educated in France and England. A mysterious marriage while he was an Oxford undergraduate wrecked his academic career and radicalized his views on sexual and marital questions, as did a three-year teaching stint in Jamaica. Despite his lifelong ill health and short life, Allen was a writer of extraordinary productivity and range. About half - more than 30 books and many hundreds of articles - reflects interests which ran from Darwinian biology to cultural travel guides. His prosperity, however, was underpinned by fiction; more than 30 novels, including *The Woman Who Did*, which has attracted much recent attention from feminist critics and historians. *The Better End of Grub Street* uses Allen's career to examine the role and status of the freelance author/journalist in the late-Victorian period. Allen's career delineates what it took to succeed in this notoriously tough profession.

### **The Unofficial Harry Potter Insults Handbook**

A collection of student essays that captures the passionate engagement their generation brings to the Harry Potter phenomenon. *A Wizard of Their Age* began when the students in Cecilia Konchar Farr's "Six Degrees of Harry Potter" course at St. Catherine University kept finding errors in the available scholarship. These students had been reading Harry Potter for their entire literate lives, and they demanded more attention to the details they found significant. "We can do better than this," they said. Konchar Farr, two undergraduate teaching assistants, and five student editors decided to test that hypothesis. After issuing a call for contributions, they selected fifteen thoughtful academic essays by students from across the country. These essays examine the Harry Potter books from a variety of perspectives, including literary, historical, cultural, gender, mythological, psychological, theological, and genetic—there is even a nursing care plan for Tom Riddle. Interspersed among the essays are brief vignettes entitled "My Harry Potter Story," where students write about their personal encounters with the novels. Although a quick Internet search yields a dazzling number of books about Harry Potter, few are as deeply invested or insightful as *A Wizard of Their Age*. Written and edited by—and for—members of the Harry Potter generation, these essays demonstrate this generation's passionate engagement with the Harry Potter phenomenon and provide numerous critical insights into the individual novels and the series as a whole.

Iran has one of the world's highest rates of drug addiction: estimated to be between 2 and 7 percent of the entire population. This makes the questions that this book asks all the more salient: what is the place of illegal substances in the politics of modern Iran? How have drugs affected the formation of the Iranian state and its power dynamics? And how have governmental attempts at controlling and regulating illicit drugs affected drug consumption and addiction? By answering these questions, Mazyar Ghiabi suggests that the Islamic Republic of Iran's image as an inherently conservative state is not only misplaced and inaccurate, but in part a myth. In order to dispel this myth, he skilfully combines ethnographic narratives from drug users, vivid field observations from 'under the bridge', with archival material from the pre- and post-revolutionary era, statistics on drug arrests and interviews with public officials. This title is also available as Open Access on Cambridge Core.

Language and food are universal to humankind. Language accomplishes more than a pure exchange of information, and food caters for more than mere subsistence. Both represent crucial sites for socialization, identity construction, and the everyday fabrication and perception of the world as a meaningful, orderly place. During and after the Second World War, there was a concerted thinking about religion in Britain. Not only were leading international thinkers of the day theologians—Ronald Niebuhr, Paul Tillich, Jacques Maritain—but leading writers contributed to discussions about religion. Graham Greene, Muriel Spark, and Barbara Pym incorporated miracles, evil, and church-going into their novels, while Louis MacNeice, T. S. Eliot, and C. S. Lewis gave radio broadcasts about the role of Christianity in contemporary society. Certainly the war revived interest in aspects of Christian life. Salvation and redemption were on many people's minds. The Ministry of Information used images of bombed churches to stoke patriotic fervour, and King George VI led a series of Days of National Prayer that coincided with crucial events in the Allied campaign. After the war and throughout the 1950s, approximately 1.4 million Britons converted to Roman Catholicism as a way of expressing their spiritual ambitions and solidarity with humanity on a world-wide scale. Religion provided one way for writers to answer the question, 'what is man?' It also afforded ways to think about social obligation and ethical engagement. Moreover, the mid-century turn to religion offered ways to articulate statehood, not from the perspective of nationhood and politics, but from the perspective of moral action and social improvement. Instead of being a retreat into seclusion and solitude, the mid-century turn to religion is a call to responsibility.

## Second Coming

Sabotage is the deliberate disruption of a dominant system, be it political, military or economic. Yet in recent decades, sabotage has also become an artistic strategy most notably in Latin America. In Brazil, Colombia, Mexico, Chile and Argentina, artists are producing radical, unruly or even iconoclastic work that resists state violence, social conformity and the commodification of art. Sabotage Art reveals how contemporary Latin American artists have resorted to sabotage strategies as a means to bridge the gap between aesthetics and politics. The global status of and market for Latin American art is growing rapidly. This book is essential reading for those who want to understand this new, dissident work, as well as its mystification, co-option and commercialisation within current academic historiographies and art-world curatorial initiatives."

## The Value of Culture

Francisco Goya y Lucientes (1746-1828) created magnificent paintings, tapestry designs, prints, and drawings over the course of his long and productive career. Women frequently appeared as the subjects of Goya's works, from his brilliantly painted cartoons for the Royal Tapestry Factory to his stunning portraits of some of the most powerful women in Madrid. This groundbreaking book is the first to examine the representations of women within Goya's multifaceted art, and in so

doing, it sheds new light on the evolution of his artistic creativity as well as on the roles assumed by women in late eighteenth- and early nineteenth-century Spain. Many of Goya's most famous works are featured and explicated in this beautifully designed and produced book. The artist's famous tapestry cartoons are included, along with the tapestries woven after them for the royal palaces of the Prado and the Escorial. Goya's infamous Naked Maja and Clothed Maja are also highlighted, with a discussion on whether these works were painted at the same time and how they might have originally hung in relation to one another. Focus is also placed on Goya's more experimental prints and drawings, in which the artist depicted women alternatively as targets of satire, of sympathy, or of admiration. Essays by eminent authorities provide a historical and cultural context for Goya's work, including a discussion on the significance of fashion and dress during the period. The resultant volume is surely to be treasured by all who admire Goya's art and by those who are interested in women's issues of his time.

Culture manifests itself in everything human, including the ordinary business of everyday life. Culture and art have their own value, but economic values are also constrained. Art sponsorships and subsidies suggest a value that exceeds market price. So what is the real value of culture? Unlike the usual focus on formal problems, which has 'de-cultured' and 'de-moralized' the practice of economics, this book brings together economists, philosophers, historians, political scientists and artists to try to sort out the value of culture. This is a book not only for economists and social scientists, but also for anybody actively involved in the world of the arts and culture.
