The Phonetic Journal

In the era of the early Reformation many influential texts were printed in Antwerp. Not the least of these were the biblical translations of William Tyndale (c. 1494-1536). Despite the relative tolerance of Antwerp's magistrates, which made such publications possible, Tyndale was eventually seized by officers of Charles V and was executed as a heretic in Vilvoorde, north of Brussels. Tyndale's translations of the New Testament (Worms, 1526; Antwerp, 1534, 1535, 1536) and of the Pentateuch (Antwerp, 1530) were profoundly to shape future English bibles, and through them the language and culture of the English-speaking world. Tyndale's Testament, a volume with contributions by leading international scholars, puts the achievement of Tyndale into its broad cultural and intellectual context, in which Erasmus and Luther were the key figures, and into its immediate commercial and technological location in sixteenth-century Antwerp. It also sketches the transmission of Tyndale's work to future English translations through the Coverdale Bible (Antwerp, 1535), and traces the development of his present-day recognition as the father of modern English Bible translation and of the Anglo-American Evangelical tradition. The volume Tyndale's Testament is to be published to coincide with the Fourth International Tyndale Conference, at the Lessius Hogeschool in Antwerp. It includes the catalogue of a major exhibition to be held (3 September to 1 December 2002) in the UNESCO-listed Museum Plantin-Moretus in Antwerp. The publication is richly illustrated with over a hundred pictures (ten in colour), including a full colour reproduction of the only surviving title page of the first English New Testament in print, from the unique complete copy in the Wurttembergische Landesbibliothek, Stuttgart.

The Inventor's Bible, 3rd Edition

Black Inventors, Crafting Over 200 Years of Success, highlights the work of Black inventors from over seventy countries. The author, Keith C. Holmes, has spent more than twenty years researching Black inventors from countries that include Australia, Bahamas, Barbados, Canada, Cuba, Ethiopia, France, Germany, Ghana, Dominican Republic, Guadeloupe, Guyana, Haiti, Italy, Jamaica, Japan, Kenya, Mozambique, Nigeria, St. Vincent, South Africa, Tanzania, Trinidad and Tobago, the United Kingdom and the United States. Without inventions, innovations, financial resources, materials, muscle and labor saving devices, civilizations cannot exist and flourish. This book documents a number of inventions, patents and labor saving devices conceived by Black inventors. Among many other inventions, pre-enslaved Africans, developed agricultural tools, building materials, medicinal herbs, cloth and weapons. Although historical documents emphasize that millions of Black people arrived in Canada, the Caribbean, Central and South America and the United States under slavery's yoke, it is relatively unknown that thousands of Africans and their descendants developed numerous labor-saving devices and inventions that spawned companies which generated money and jobs, worldwide. While most authors focus primarily on American and European inventors, Keith Holmes introduces inventions, both past and present, that Black people, developed and patented globally and multiculturally. Black Inventors, Crafting Over 200 Years of Success, also features early Black inventors from virtually every state in the US. It includes details about the first Black inventor who obtained a patent in both the Caribbean and the United States. To date, seventeen African American men have been inducted into the National Inventors Hall of Fame. Two inventors, Jan E, Matzeliger, (Suriname) and Elijah McCoy, (Colchester, Canada) were not born in this country. The material available in this book, one of the first to address the diversity of black inventors and their inventions from a global perspective, effectively gives the reader, researcher, librarian, student, and teacher the materials they need to understand that the Black inventor is not only a national

phenomenon, but also a global giant.
