1991 Gale's Auto Sourcebook

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

Profil

This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models.

Kiplinger's Personal Finance Magazine

The 41 papers include most of the presentations at the conference, and provide an international perspective on efforts to create integrated transportation systems in cities without utterly ruining the environment. The perspective is also multidisciplinary, with contributions from transportation systems, environmental studies, planning, funding, management, vehicle and transport technology, transport modeling, and traffic studies. The main themes are rail transportation systems, bus and freight transport systems, private vehicle studies, general transportation systems, residential and pedestrian studies, studies of user's choices, future vision, and environmental aspects. Case studies come from such places as Argentina, Scotland, the Netherlands, Croatia, Japan, Ireland, and Germany. Reproduced from typescripts, some double spaced. No subject index.
