Sheet Metal Industries

Laser Cutting Guide for Manufacturing presents practical information and troubleshooting and design

tools from a quality manufacturing perspective. Equally applicable to small shops as it is to large fabricator companies, this guide is a roadmap for developing, implementing, operating, and maintaining a laser-cutting manufacturing enterprise. The book focuses on metal cutting of sheets, plates, tubes, and 3-D shaped stampings. It presents today's reality of the engineering and business challenges, and opportunities presented by the rapid penetration cutting in all facets of industry.

Work your way to fabricating success People have been hammering metal into shields, cookware, and ceremonial headdresses for centuries, and fabrication continues to be a popular and growing industry today. Fabricating For Dummies provides you with all the information you need to begin learning about metalworking, or fill any gaps in your existing knowledge in order to advance your career. Simply put, there's little out there for light reading on manufacturing. What's available is often quite expensive, so boring it puts you to sleep, or filled with so much technical gobbledegook that one's eyes glaze over within a few pages. This book offers a much-needed alternative, cutting through the jargon and getting right to the heart of what you need to know to take your fab skills to fabulous new heights. Get a glimpse of the day in the life of a fab worker Discover the different alloys, shapes, and sizes of sheet metal Understand welding and joining processes Master the use of press brakes, stamping presses, and turret punches Whether you want to get your feet wet with waterjets, laser cutters, or hi-definition plasma cutters, there's something for you inside this hands-on book!
