Functional Neurology for Practitioners of Manual Medicine takes the reader from the embryonic beginnings of the nervous system, through the biochemistry of receptor activation and on to the functional systems of the nervous system. Concepts, relationships and scientific mechanisms of the nervous system function are covered, and this aids the practitioner in developing their clinical approach to a wide variety of patient presentations. The text is fully referenced, which allows the reader to immediately apply the concepts to practice situations. New for this edition are new chapters on pain (including headache) and theoretical evidence, plus extensive electronic resources supporting the text. Utilizes our understanding of how the nervous system works in the treatment of a variety of clinical conditions Demystifies the clinical results seen in the practice of Functional Neurology and scientifically validates its clinical success Addresses function rather than pathology, allowing the reader to gain a firm understanding of the neurological processes seen in health and disease Contains clinical cases which are designed to be read and answered before starting the chapter to allow the reader to gauge their current state of knowledge 'Quick Facts' introduce new concepts or allow rapid review of information already presented in the text in a brief and succinct manner Contains a detailed overview of the concepts relating to our understanding

Comprehensive Manual of Ophthalmology

A comprehensive coronary care textbook for medical, nursing and paramedic staff The Coronary Care Manual, 2nd Edition is a practical medical manual designed to assist with management of the acute coronary patient. This respected medical resource is written by a group of coronary experts, both Australian and international. Its aim is to strike a balance between a large and rapidly-changing evidence base and practical application in the Coronary Care Unit, Intensive Care Unit, Emergency Department and the ambulance. The second edition of this important health textbook covers an extensive range of coronary care medicine, providing a handy companion for a night 'on call'. Chapter topics in the Coronary Care Manual, 2nd Edition include pathophysiology, drug and non-drug therapies and postcoronary management, with chapters organised into subsections. Completely redesigned with fresh, new artwork, this new edition of the Coronary Care Manual is organised to suit academics and medical practitioners alike. • covers a broad range of coronary care medicine • provides specific advice on the management of common clinical problems • eliminates the need to refer to a larger reference book • features a consistent style and focus, with standardised artwork for figures • is now also available as an eBook! A code inside the Coronary Care Manual enables a full text download, allowing you to browse and search electronically, make notes and bookmarks in the electronic files and highlight material

CASL, the Common Algebraic Specification Language, was designed by the members of CoFI, the Common Framework Initiative for algebraic specification and development, and is a general-purpose language for practical use in software development for specifying both requirements and design. CASL is already regarded as a de facto standard, and various sublanguages and extensions are available for specific tasks. This book illustrates and discusses how to write CASL specifications. The authors first describe the origins, aims and scope of CoFI, and review the main concepts of algebraic specification languages. The main part of the book explains CASL specifications, with chapters on loose, generated and free specifications, partial functions, sub- and supersorts, structuring specifications, genericity and reusability, architectural specifications, and version control. The final chapters deal with tool support and libraries, and present a realistic case study involving the standard benchmark for comparing specification frameworks. The book is aimed at software researchers and professionals, and follows a tutorial style with highlighted points, illustrative examples, and a full specification and library index. A separate, complementary LNCS volume contains the CASL Reference Manual.

Comprehensive Manual of Ophthalmology in which sufficient information has been provided in easy-to-understand language with a definite and uniform format. Many tables have been incorporated for summarizing key facts about different diseases. Enough standard colored illustrations will be of immense help. A short list of Further Readings has been added at the end of each chapter for those who want to persue further on the particular topic. I consider this humble endeavor as a mini textbook of ophthalmology in a refreshingly reader-friendly fashion, which I
